**Saturday, September 18, 2010
10 a.m. to 2 p.m.**

*San Mateo County Health Administration Building, Room 100
225 37th Ave. in San Mateo*

Whooping cough is spreading in California and in San Mateo County. It is a serious and contagious disease that causes severe coughing attacks that make it hard to breathe, and can last for months.

Whooping cough is especially dangerous for infants who are too young to be vaccinated and can result in hospitalization, and in some cases, death.

Get vaccinated – it's safe, and the best way to protect yourself and your family
