GPRAs mandate accountability and performance-based management by Federal agencies, focusing on results or outcomes in evaluating the effectiveness of Federal activities and on measuring progress toward achieving national goals and objectives.

Grantees shall comply with all GPRAs requirements as defined in the GFA. They are as follows:

For programs funded by the Targeted Capacity Expansion funding stream:

Grantees must comply with GPRAs data collection and reporting requirements, including but not necessarily limited to the collection of CSAT Core Client Outcomes.

CSAT GPRAs requirements include data collection about grant-supported service recipients at baseline/intake, six months after intake, and twelve months after intake. Grantees are expected to collect baseline GPRAs data on all persons served through the grant, and six and twelve month data on a minimum of eighty percent (80%) of all clients in the intake sample. Grantees should consider this requirement when preparing the evaluation budget section of the application.

CSAT's GPRAs Core Client Outcome domains are:

Ages 18 and above: Percent of service recipients who: have no past month substance abuse; have no or reduced alcohol or illegal drug consequences; are permanently housed in the community; are employed; have no or reduced involvement with the criminal justice system; and have good or improved health and mental health status.

Ages 17 and under: Percent of service recipients who: have no past month use of alcohol or illegal drugs; have no or reduced alcohol or illegal drug consequences; are in stable living environments, are attending school; have no or reduced involvement in the juvenile justice system; and have good or improved health and mental health status.

For programs funded as Knowledge Application/Best Practices:

Grantees are expected to collect baseline GPRAs data on all participants at KA events (Meetings, Trainings, and Technical Assistance See Appendix XX for the OMB approved forms). In addition, the applicant is expected to conduct a 30 day follow-up to the events with a minimum 80% of all baseline participants followed-up. Applicants should consider this requirement when preparing the evaluation budget section of the application.

Grantees involved in KA dissemination activities (the development and publication of a product) are expected to collect baseline satisfaction data on that product using the OMB approved KA product dissemination form.

In addition applicants should describe any prior applicant experience in conducting follow-up survey, use and effect (if any) of incentives in the prior activities, and the specific methods (including incentives) to achieve an 80% response rate for the follow-up surveys.

Regardless of the programs data are to be sent electronically to either CSAT GPRA-GPO or the programs data coordinating center...this is specified in the orientation meeting of grantees at the beginning of the grant program.

If you do not know which is applicable contact your Government Project Officer

These data files are to be send: 30 days after the close of each quarter.

Consequences for non-compliance

Failure to comply with these GPRA requirements could jeopardize future years funding.
