**COUNTY HIGH RISK PEST EXCLUSION PROGRAM
ESTIMATED WORK PLAN GUIDELINES**

PROGRAM DEFINITIONS

High-Risk Shipments: are those where there exists a high degree of likelihood that one or more “A” or “Q” rated plant pests will be introduced into or spread within the State by movement or entry of the shipment. “A” and “Q” rated plant pests have been determined to have potential for causing severe damage to the State’s agricultural industry, natural resources, or environment, and as such any shipment likely to harbor such pests is considered high-risk.

are to be inspected. “Flower of the Month Club” bulbs, bare-root nursery stock from areas which do not represent a serious quarantine risk, plant materials from California origin with nursery certification, etc.) moving through a “high-risk” facility may be monitored the premise visit. These shipments will not be included as “high-risk” shipments inspected. High-risk shipments which should be inspected include such items as cut flowers and nursery stock from quarantine areas, any plant materials in unmarked parcels, and other plant material shipments which have a historical record of “A” and “Q” rated pest interceptions.

High-Risk Pathways: those facilities where high-risk shipments are regularly or frequently intercepted. The known high-risk pathways have been listed on the Estimate of High-Risk Pest Exclusion Activities, including U.S. Postal Distribution Centers, UPS (except local), Federal Express, Air Freight, Air Freight Forwarded, Truck Referrals (008a-Gypsy Moth, 008-Plants & 008-Other), Specialty Markets, Swap Meets, Post Entry Quarantine, and “Other” pathways identified in your work plans and approved by the Department.

Shipments Inspected: Shipments physically opened and examined. This is not packages or pots inspected. A shipment is one lot of plant material sent from one shipper to one receiver via one mode of transport.

Rejections: Number of state level rejection notices written. This does not include rejections of materials for failing to meet nursery standards of cleanliness, or materials rejected for B or C rated pests. Any time a live A or Q rated pest is found in a shipment a rejection notice should be issued.

Pest Interceptions: Number of “A” and “Q” pest interceptions. When more than one pest species is found in a single shipment, each different species is to be counted as an interception. Finding more than one pest of the same species does not equate to multiple interceptions.

U.S. Post Office: Postal distribution centers formerly known as sectional centers that sort mail sealed against inspection (first-class, priority, and express mail parcels).

United Parcel Service (except local service): Facilities which process parcels shipped via expedited service versus facilities that process only parcels moving locally.

Air Freight: Air cargo shipments inspected at the airport facility or at destination (see next item).

Air Freight/Forwarded: Shipments allowed to proceed to destination or another location for inspection within the same county or to another county and under a hold notice (blue tag) or by compliance agreement authorization.

Truck (008a): Shipments of historically high-risk household articles from historically high-risk areas that require inspection for gypsy moth.

Truck (008-Plants & 008-Other): High-risk shipments moving to destination under quarantine hold notice. This does not include blue-tagged intrastate shipments of nursery stock inspected for glassy winged sharpshooters.

Post-Entry Quarantine Inspections: These inspections include both site and plant inspections. A shipment should be recorded when plant material is inspected.

Other: This column is to be used to estimate the workload for any high-risk pathway not already listed on the form; these may include: pet stores or aquariums, express parcel carriers, sea freight forwarded or other special focus activities approved by the Department. Special focus activities are then to be described under "Special Focus Description".

ACCOUNTING GUIDELINES

Program cost estimates for high-risk exclusion activities conducted at optimal levels are to be estimated based upon the guidelines and definitions contained within the County Agricultural Commissioners' Annual Financial Statement Procedures Manual. This cost/hour figure is to be estimated from an average of the costs/hour for Fiscal Years 1998/1999, 1999/2000, and 2000/2001. A county may choose to use their established County Auditor approved hourly rate in lieu of the three- year average. This would be the rate charged an applicant for phytosanitary or other type of certification if such a rate is established.

PROGRAM GUIDELINES

1. All inspections of high-risk terminal points are to be conducted as close to optimal service levels as is fiscally possible.
2. Optimal service level inspections are those conducted during the sort time(s) or before the last critical dispatch(s) of the facility monitored.
3. All high-risk shipments are to be inspected. Shipments not presenting a high risk that are moving through a high-risk facility may be monitored and inspected as time permits but should not be included as a program cost or counted as a measure under this work plan.
4. A shipment is any amount of agriculturally regulated product/packages/potted plants from one specific shipper, in one shipment, sent to one specific consignee.

OPTIMAL SERVICE LEVELS FOR PEST EXCLUSION TERMINAL INSPECTION FREQUENCY

FACILITY	OPTIMUM INSPECTION FREQUENCY
U.S. Postal Distribution Center, United Parcel Service & Federal Express	Daily during sort
Air Freight	Daily when
Truck Referrals (008) & (008a)	100 %
