Description of Proposed Traffic Control Device:

1.) Amending a Loading Zone in North Fair Oaks, Redwood City Area

Discussion: The owner of the business located at 438 Stanford Avenue in North Fair Oaks requested that the existing 28-foot Loading Zone in front of his business be moved closer to his roll-up door, which is a more convenient location for him. Staff reviewed the request and recommends changing the Loading Zone location because of the following:

- A. The new location, beginning 46 feet south of the existing Loading Zone and 71 feet south of the intersection, will better suit the needs of the business owner.
- B. The new parking zone arrangement will not negatively impact neighborhood parking because the length of the zone will remain the same at 28 feet long
