Long Form Agreement/Business Associate v 8/19/08

In consideration of the payments set forth in Exhibit "B", Contractor shall provide the following services:

SCOPE OF SERVICES
CalWIN Enterprise Printing
DOCUMENT FULFILLMENT SERVICES

CONTRACTOR agrees to exercise special skill to accomplish the following results:

- 1) The processing for CalWIN documentation will be integrated, run at the HP Enterprise Services Data Center (formerly known as Electronic Data Systems) at 10888 White Rock Road, Rancho Cordova California.
- 2) Several types of client correspondence will be printed under this Agreement. All subject documents will be produced for mailing out to clients. Documents may be single or double sided, may require that a duplicate copy be sent, and may require that return envelopes or other items be stuffed with them.

A daily batch cycle will be run each night, seven days a week, and a merged output file for San Mateo County will be produced the following morning. This file will be available at HP Enterprise Services in the morning, Tuesday through Saturday, usually by 6:00 AM. In the event of a delay or damage in output issued by HP Enterprise Services output may be delayed to USPS, but will delivered with 24 hours. In normal output delivery, output will be rendered and delivered to the United States Postal Service (USPS) in time for next day delivery to the addressee, unless other timeframes are agreed to by the COUNTY and the CONTRACTOR. (The standard for COUNTY mail delivery is to: West Sacramento Post Office, by 8:00 PM.) There are other cycles that are run less frequently than daily. Some of these will have output as well.

Document Fulfillment Services (DFS) will arrange to pick up the data DVD disks at the HP Enterprise Services location in Rancho Cordova daily. The processing will take place at the DFS office located at 910 Riverside Parkway, Suite 40 in West Sacramento.

The mail pieces would be turned over to the USPS daily by 8:00 PM.

- 3) Client correspondence that is created by the batch process is contained in multiple files of Printer Control Language 5 (PCL5) images. Each document contains a header section. The header section contains PCL 5 "non-op". The non-op section is a part of the PCL stream in each set of client correspondence – not a separate record. This header section identifies the information regarding each correspondence. These files will be stored on up to 5 data DVD disks. PCL5 images are used because the client correspondence is printed in many different languages including English, Russian and Spanish. These PCL5 images are sorted in client address order. Alternatively, HP Enterprise Services may electronically transmit smaller batches of PCL5 files to the processing site. CONTRACTOR may be able, at CONTRACTOR's cost; to secure the data delivered on DVD's by other

means. DFS has a secure FTP site with 128-bit encryption capability.

- 4) Services shall include materials (paper, envelopes, etc.) and processing (receiving and batching data, printing, folding, inserting, presorting, delivery to USPS, etc.) using postage invoiced separately to COUNTY. Postage shall be reimbursed to the CONTRACTOR at the same discounted postal rate that is actually applied to the letters.
- 5) Additional COUNTY supplied inserts may be included in each run. A return envelope may also be required, depending on the type of document. Inserts must be selectively inserted in each document, triggered by information on the document. Inserts will be approved and scheduled by the counties.
- 6) Documents produced in monthly cycles may need to be held for later mailing. These may be mixed with other documents on peak days.

Any and all documents that need to be held for later mailings will be identified prior to processing daily work. These documents will be identified by account or invoice number and will be treated as a "pull statement" item. If these documents need to be inserted in later mailings, DFS will be notified when and where this is to occur. A special handling charge will apply (See pricing list – Exhibit B.)

- 7) Quality control measures must be inherent in the process. CONTRACTOR must certify that services are provided using fully automated production processes that are capable of tracking each individual mail piece through the printing, inserting, and mailing processes. Duplicated, missing and misprinted documents and inserts and other errors must be identified and remedied before mailing. Mail must be in the hands of the USPS as described above. Any errors or variation must be reported to the COUNTY immediately. A report including the date and time items were mailed, the unique batch identifier, the number of documents printed, items mailed, inserts included, and postage used will be sent to the COUNTY daily at the completion of the process.

DFS utilizes its own custom built software, Client Document Services (CDS), which automates the production process and offers extensive quality control measures. This program allows DFS to track the work order process from creation to completion, as well as the individual mail pieces through out. A unique "key-line code" is added to each document for tracking purposes and reprints. This code, which includes a sequence number, work order number and location identifier, makes it possible to track an individual document at any time.

The CDS program includes a "Mail Wizard" module that automates the postage process by tracking the usage levels by weight and job name. The date, meter time and cumulative account balance are available in detail through this module as well. The program offers a variety of reports showing summary and/or detailed usage for a designated time period.

The automated inventory module of the CDS system allows DFS to keep a close watch on the available resources. Specific thresholds are determined for each

inventory resource and quantities are depleted upon work order completion. Again, this module offers a variety of reports showing summary and/or detailed usage for a designated time period.

- 8) Errors not remedied by CONTRACTOR's quality control, involving 100 or more pieces from a single mailing, will incur a penalty credit in favor of the COUNTY in the amount of \$.04 per piece. This will include client correspondence mailed after the target mailing date.
- 9) CONTRACTOR must be USPS CASS certified to ensure address cleansing and correction capability.
- 10) CONTRACTOR will submit a weekly progress report on the activities outlined above.

PAYMENTS AND RATES

In consideration of the services provided by Contractor in Exhibit "A", County shall pay Contractor as detailed below:

TOTAL	\$ 195,000

Payment under this Agreement shall not exceed \$245,000 per fiscal year.**

- ** Upon approval of the Human Services Agency Director or her designee, additional allocations will be made available to CONTRACTOR for unanticipated service costs requested by the COUNTY, costs may not to be exceed \$50,000 per year.

The County may terminate this Agreement or a portion of the services referenced in the Attachments and Exhibits based on the need for services and upon unavailability of Federal, State, or County funds, by providing written notice to Contractor as soon as is reasonably possible after the county learns of said unavailability of outside funding.
