#### **EXECUTIVE SUMMARY**

Blackstone Consulting LLC (Blackstone) performed a Phase I Environmental Site Assessment (Phase I ESA) of the Circle Star Plaza located at 1 and 2 Circle Star Way in San Carlos, San Mateo County, California (subject property). Blackstone understands that this assessment is being performed as part of a potential real estate transaction. The purpose of the Phase I ESA is to identify recognized environmental conditions (RECs) in accordance with ASTM Standard E 1527-13 and other agreed-upon ASTM *Non-Scope Considerations* (*Business Environmental Risk Issues*).

# **SUBJECT PROPERTY INSPECTION**

Name of Inspector: David Arritt

**Date of Inspection:** March 4, 2014

Subject Property Representative: Ms. Debbie Kaiser, Property Manager for Circle Star Plaza

# **SUBJECT PROPERTY DESCRIPTION**

**Street Address:** 1 & 2 Circle Star Way (Office Buildings) and 1709 Industrial Way

(Parking Structure)

City and State: San Carlos, California

**County:** San Mateo

**Legal Description:** San Mateo County Assessor Parcel Numbers: 046240180 and

052103170

Owner(s): County of San Mateo

**Subject Property Size:** Approximately 6.38 acres

**Subject Property Use:** The subject property is developed with two 4-story office towers

and a three level aboveground parking garage.

**Year(s) Built:** 1998-2000

Structure(s)	Location On Subject Property	Number of Stories	Size (RSF)

Two Circle Star Way	East-Central	4	107,100
Parking Garage	Southeast	3	129,000
Other Subject Property	The western portion of	of the subject prop	erty is developed with a
Features:	the property (Circle parking structure. Ar landscaped courtyard billboard is located property. A constructemporarily located in The remainder of the	Star Way) and the menities at the sult with a water feat in the east-central ction trailer and the parking area address subject property	ne main drive entrance to e drive entrance to the oject property include a ture. A leased electronic portion of the subject storage containers are ljacent to Circle Star Two. y consists of landscape nalt paved parking areas

#### **HISTORICAL INFORMATION**

Reasonably ascertainable historical information indicates the subject property was undeveloped land from at least 1899 until developed, along with the northwest adjoining property, with the Circle Star Theater and associated surface parking in the early 1960s. The theater was demolished in 1997, and the present-day buildings and parking garage were constructed on the subject property in phases between 1998 and 2000.

The northwest adjoining property was undeveloped land until the early 1960s, when it was developed as a parking area and a portion of the Circle Star Theater building (extending from the subject property). Following the demolition of the theater and associated parking area in 1997, the present-day hotel and surface parking lot were developed by 1998. A roadway was initially constructed along the northeastern property boundary by the 1940s, and expanded into the present-day Highway 101 freeway (8-lane divided road) in the 1950s. The northeast adjoining land area beyond the Highway 101 freeway has historically been undeveloped marsh land. The southeast adjoining office and warehouse buildings were constructed between 1948 and 1968. The southwest adjoining single-family residential area beyond Industrial Way was constructed between 1943 and 1948.

Blackstone performed a Phase I ESA of the subject property in conformance with the scope and limitations of ASTM Standard Practice E 1527-13, the regulations at 40 CFR Part 312, and the Master Technical Services Agreement (MTS) between Post & Schell, P.C. (Post & Schell) and Blackstone, dated April 19, 2012. Any exceptions to or deletions from this practice are described in Sections 1.2 through 1.4 of this report. This assessment has revealed no evidence of *recognized environmental conditions* (*RECs*) in connection with the subject property.

This section is only intended to represent a brief summary of our findings, and is not a detailed account of all the information provided in this report. The report should be reviewed in its entirety prior to drawing any final conclusions as to potential environmental conditions associated with the subject property.

#### 1.0 INTRODUCTION

#### 1.1 PURPOSE

Blackstone Consulting LLC (Blackstone) performed a Phase I Environmental Site Assessment (Phase I ESA) of the Circle Star Plaza located at 1 and 2 Circle Star Way in San Carlos, San Mateo County, California (subject property).

The purpose of this Phase I ESA is to investigate and identify *recognized environmental conditions* (*RECs*) associated with the subject property and/or surrounding properties. ASTM Standard Practice E 1527-13 defines RECs as:

The presence or likely presence of any hazardous substances or petroleum products in, on, or at a property due to any release to the environment, under conditions indicative of a release to the environment, or under conditions that pose a material threat of a future release to the environment. De minimis conditions are not recognized environmental conditions.

A *de minimis condition* is a condition that generally does not present a threat to human health or the *environment* and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.

Additionally, this Phase I ESA was conducted to identify *controlled recognized environmental conditions* (*CRECs*) associated with the subject property and/or surrounding properties. ASTM Standard Practice E 1527-13 defines CRECs as:

A recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls).

This Phase I ESA also was conducted to identify *historical recognized environmental conditions* (*HRECs*) associated with the subject property and/or surrounding properties. ASTM Standard Practice E 1527-13 defines HRECs as:

A past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls).

This practice is generally intended for the User to satisfy one of the requirements to qualify for the *innocent landowner*, *contiguous property owner*, or *bona fide prospective purchaser* limitations on CERCLA liability; that is, this practice constitutes all appropriate inquiries (AAI) into the previous ownership and uses of the subject property consistent with good commercial or customary practice as defined at 42 U.S.C. §9601(35)(B) and the regulations at 40 CFR Part 312.

ASTM Non-Scope Considerations (Business Environmental Risk Issues) are detailed in Section 1.3 and outlined in the accepted scope detailed in the Master Technical Services Agreement (MTS) between Post & Schell, P.C. (Post & Schell) and Blackstone, dated April 19, 2012.

#### 1.2 SPECIAL TERMS AND CONDITIONS

This Phase I ESA has been conducted in accordance with ASTM Standard Practice E 1527-13, the regulations at 40 CFR Part 312, and the MTS Agreement between Post & Schell and Blackstone. Qualifications of the professionals conducting this assessment have been provided in Appendix G.

Blackstone performed the professional services, obtained findings, rendered conclusions, and prepared recommendations in accordance with generally accepted practices of other environmental consultants undertaking similar assessments at the same time in the same geographical area.

Historical and environmental information pertaining to the subject property has been included in this report to the extent that such information is *practically reviewable*, as defined in the above-referenced standard practice.

## 1.3 SCOPE OF SERVICES

As detailed in the Agreement, this Phase I ESA was conducted in accordance with the industry standard ASTM Standard Practice E 1527-13 and as such in accordance with all appropriate inquiries (AAI) into the previous ownership and uses of the subject property consistent with good commercial or customary practice as defined at 42 U.S.C. §9601(35)(B) and the regulations at 40 CFR Part 312. This Phase I ESA included the following services:

- 1. A subject property inspection to identify and evaluate potential sources of RECs such as underground storage tanks (USTs), aboveground storage tanks (ASTs), equipment containing polychlorinated biphenyls (PCBs), waste and chemical storage areas, and wastewater and stormwater discharges. The inspection included observations for evidence of chemical spills, releases, or waste disposal on the subject property.
- 2. A review of subject property records and interviews with subject property representatives with regard to current and former subject property operations to identify known or potential environmental concerns.
- 3. A visual survey of the properties in the vicinity of the subject property to evaluate the potential for RECs at the subject property from these properties.
- 4. A review of historical information to identify RECs at the subject property from historic on and off property uses. To the extent feasible under the conditions of the assessment, the historical information obtained included verbal information from subject property and/or local agency representatives. In addition, some or all of the following records,

where *publicly available* and *practically reviewable*, were reviewed: construction plans, zoning maps, building permits, property record cards, topographic maps, fire insurance maps, historical city directories, and aerial photographs.

5. A review of State and Federal environmental database information.

Blackstone also performed the following activities to identify ASTM *Non-Scope Considerations* (*Business Environmental Risk Issues*) in addition to the ASTM requirements and as required per the Agreement:

Document research, visual and/or sampling surveys, and interviews for the presence of:

- Air Emissions.
- Asbestos-containing materials (ACM),
- Lead-based paint (LBP),
- Radon,
- Wetlands,
- Apparent mold growth (AMG) and water intrusion,
- Lead in Drinking Water,
- Potable/Irrigation Groundwater Well Survey, and
- Oil and Gas Survey.

The scope of this Phase I ESA did not include surface water, soil, soil vapor, or groundwater sampling. Consequently, conclusions provided with regard to surface water, soil, soil vapor, and groundwater impacts are limited to those that can be formed based on a non-intrusive investigation. The absence of environmental hazards in the subsurface cannot be guaranteed based on conditions observed on the surface.

Where performed, the limited ACM, LBP, AMG, and radon surveys are intended to provide an indication of the potential for significant environmental issues associated with these ASTM Non-Scope Considerations (Business Environmental Risk Issues). Hidden materials or locations such as those inside walls, inaccessible attics, crawl spaces, and inside ductwork and piping were not evaluated. As such, these surveys should not be regarded as comprehensive surveys for demolition or renovation purposes or indoor air quality health risk assessments, vapor intrusion into buildings, or explosion hazards.

#### 1.4 SIGNIFICANT ASSUMPTIONS AND DATA GAPS

The subject property inspection consisted of a walkover of the subject property perimeter and exterior subject property areas, and a walk-through of the common areas, storage areas, mechanical areas, and representative office areas. Building interiors were walked through at the direction of the Subject Property Representative. Not all interior building areas were observed. Furthermore, during the subject property inspection, Blackstone did not inspect inaccessible areas of the subject property including crawl spaces, beneath parked motor vehicles, a construction trailer, storage containers, under manholes or areas of dense vegetation. The adjoining properties were visually observed from curbside without being entered. There is no

reason to believe the inability to inspect these areas would alter the findings or recommendations set forth in this report or be considered a significant data gap. Additionally, no significant data gaps in historical information were identified that would impact our ability to identify RECs.

Conclusions stated herein are based upon publicly available information and other documented sources. Blackstone has assumed, where reasonable, that the information reviewed is true and accurate. Blackstone assumes no responsibility for inaccurate information that is not otherwise obvious in light of information of which Blackstone has actual knowledge. Blackstone's subject property observations are of the conditions observed at the time of the assessment.

Blackstone reviewed an environmental database search report. Blackstone's conclusions based on the search report are limited to the accuracy of that report. To the extent possible, Blackstone's field observations are used to verify the information or identify errors and inconsistencies in the search report regarding the listed facilities in the immediate vicinity of the subject property.

This report provides an estimation of groundwater flow direction at the subject property based on visual observations and topographical data. This assessment did not include groundwater sampling and water table elevation measurement. True groundwater flow direction can only be determined through direct measurement of groundwater elevations from properly installed on-subject property groundwater monitoring wells. The groundwater flow direction estimation should not be considered a true measurement of groundwater flow direction.

#### 2.0 USER PROVIDED INFORMATION

As defined under ASTM Standard Practice E 1527-13, Post & Schell, P.C. is considered the "User" of this Phase I ESA report. To qualify for one of the *Landowner Liability Protections (LLPs)* offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2002 (the "*Brownfields Amendments*"), the User must provide certain information based on their relationship to the purpose of the due diligence and as required by 40 CFR 312.25, 312.28, 312.29, 312.30, and 312.31.

As part of this Phase I ESA, Blackstone requested certain information from the User. A copy of the completed User Questionnaire is provided in Appendix F. The information requested and associated responses are outlined below in Sections 2.2 through Section 2.4.

In addition, the owner's representative, Ms. Debbie Kaiser Peterson, Property Manager at Circle Star Plaza ("Subject Property Representative") provided information about the subject property. The information requested and associated responses are outlined below in Section 2.5.

#### 2.1 REASON FOR PERFORMING THE PHASE I ESA

Blackstone understands that this assessment was performed for Post & Schell, P.C. representing the potential purchaser of the subject property. As such, this Phase I ESA was conducted in an effort to qualify for the *innocent landowner*, *contiguous property owner*, and *bona fide prospective purchaser* defenses to CERCLA liability and performed as an appropriate risk management and due diligence standard for real estate transactions in accordance with general industry standards which include ASTM Standard E 1527-13 and the regulations at 40 CFR Part 312.

# 2.2 ENVIRONMENTAL LIENS AND ACTIVITY USE AND LIMITATIONS (AULS)

With reference to environmental liens that are filed or recorded against the subject property (40 CFR 312.25) in recorded land title records or judicial records, the User was not aware of any environmental liens against the subject property that are filed or recorded under federal, tribal, state or local law.

With reference to activity and use limitations (AULs) that are in place on the subject property or that have been filed or recorded against the subject property (40 CFR 312.26(a)(1)(v) and (vi)) in recorded land title records or judicial records, the User was not aware of any AULs, such as *engineering controls*, land use restrictions or *institutional controls* that are in place at the subject property and/or have been filed or recorded in a registry under federal, tribal, state or local law.

In addition, the User requested Blackstone to perform an environmental lien and AUL search as part of the scope of work. Refer to Section 6.6 for a discussion of the environmental lien and AUL search.

# 2.3 SPECIALIZED KNOWLEDGE, COMMONLY KNOWN & DEGREE OF OBVIOUSNESS

With reference to specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28), the User had no specialized knowledge or experience related to the subject property or nearby properties.

With reference to commonly known or *reasonably ascertainable* information about the subject property (40 CFR 312.30), the User, to the best of their ability, provided commonly known or *reasonably ascertainable* information about the subject property that would help the *environmental professional* to identify conditions indicative of releases or threatened releases, such as:

- 1. Past uses of the subject property;
- 2. Specific chemicals that are present or once were present at the subject property;
- 3. Spills or other chemical releases that have taken place at the subject property; and
- 4. Environmental cleanups that have taken place at the subject property.

The User provided Blackstone with a prior environmental report for the subject property, which is further discussed in Section 6.7.

With reference to the degree of obviousness of the presence or likely presence of releases or threatened releases at the subject property, and the ability to detect releases or threatened releases by appropriate investigation (40 CFR 312.31), the User, based on knowledge and experience related to the subject property, was not aware of any *obvious* indicators that point to the presence or likely presence of releases at the subject property.

#### 2.4 VALUE REDUCTION FOR ENVIRONMENTAL ISSUES

With reference to relationship of the purchase price to the fair market value of the subject property if it were not contaminated (40 CFR 312.29), the User indicated that, to their knowledge, the purchase price of the subject property reasonably reflects the fair market value of the subject property, and has not been reduced due to contamination known or believed to be present at the subject property.

# 2.5 OWNER, KEY SUBJECT PROPERTY MANAGER, AND OCCUPANT INFORMATION

Blackstone interviewed the Subject Property Representative (Key Subject Property Manager) was interviewed regarding environmental conditions at the subject property. This individual was not aware of: (1) pending, threatened, or past litigation relevant to environmental conditions on the subject property; (2) any pending, threatened, or past administrative proceedings relevant to environmental conditions in, on, or from the subject property; and (3) any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to environmental conditions on the subject property.

A representative of the subject property occupant/operator, Ms. Debbie Kaiser, Property Manager at Circle Star Plaza, was available for interview during this Phase I ESA. Information obtained from interviews with the building occupant/operator has been summarized within various sections of this report.

# 2.6 PAST OWNERS, OPERATORS AND OCCUPANT INTERVIEWS

In accordance with ASTM Standard Practice E 1527-13, interviews with past owners, operators, and occupants shall be conducted to the extent that they have been identified and that the information likely to be obtained is not duplicative of information already obtained. There is no reason to believe that such interviews were necessary for this subject property or would alter the findings or recommendations set forth in this report, and the failure to identify past owners, operators, and occupants is not a significant data gap.

#### 2.7 RELIANCE

This report may be relied upon by Post & Schell, P.C. and each of its affiliates, clients, attorneys, lenders, investors and each of their successors and assigns subject to the terms and conditions of the MTS Agreement between Post & Schell, P.C. and Blackstone. No other person may rely on this report without written authorization from Blackstone and Post & Schell, P.C. If any of the above limitations conflict with the MTS Agreement, the MTS Agreement governs.

# 3.0 SUBJECT PROPERTY DESCRIPTION

The subject property is located at 1 and 2 Circle Star Way in San Carlos, San Mateo County, California. A Subject Property Location Map, depicted on the U.S. Geological Survey (USGS) *Palo Alto, California*, topographic quadrangle, is included in Appendix A.

# 3.1 SUBJECT PROPERTY CHARACTERISTICS AND FEATURES

Street Address: 1 & 2 Circle Star Way (Office Buildings) and 1709 Industrial Way

(Parking Structure)

City and State: San Carlos, California

**County:** San Mateo

Legal Description: San Mateo County Assessor Parcel Numbers: 046240180 and

052103170

Owner(s): County of San Mateo

**Subject Property Size:** Approximately 6.38 acres

**Zoning:** PD9 (Planned Development)

**Subject Property Use:** The subject property is developed with two 4-story office towers

and a three level aboveground parking garage.

Year(s) Built: 1998-2000 in phases

Structure(s)	Location On Subject Property	Number of Stories	Size (RSF)	
One Circle Star Way	Northwest	4	107,100	
Two Circle Star Way	East-Central	4	107,100	
Parking Garage	Southeast	3	129,000	

Construction Materials	The office structures are constructed similarly. The roof and elevated floors consist of composite slabs supported by steel beam sections and columns. The foundation elements are comprised of concrete with interlocking steel beams, with 6-inch slabs-on-grade.
	The parking structure is constructed of concrete slabs supported by concrete beams and concrete columns. The foundation systems are constructed with continuous concrete footings below walls, interior pad footings with interlocking grade beams.
Heating/Cooling Systems:	The two subject property buildings are cooled and heated by rooftop packaged air conditioning units (RTUs) on each of the two four-story office buildings.
Other Subject Property Features:	The western portion of the subject property is developed with a large asphalt-paved surface parking lot, the main drive entrance to the property (Circle Star Way) and the drive entrance to the parking structure. Amenities at the subject property include a landscaped courtyard with a water feature. A leased electronic billboard is located in the east-central portion of the subject property. A construction trailer and storage containers are temporarily located in the parking area adjacent to Circle Star Two. The remainder of the subject property consists of landscape features, pedestrian walkways, and asphalt paved parking areas and access drives.

A Subject Property Plan and Subject Property Photographs are provided in Appendix A.

## 3.2 UTILITIES

**Electricity Provider:** Pacific Gas & Electric (PG&E)

Natural Gas Provider: PG&E

**Potable Water:** California Water Service

**Sewer Services:** City of San Carlos

According to the Subject Property Representative and available records, the subject property has been connected to the municipal system for potable water supply and sanitary sewer disposal since construction of the present-day buildings between 1998 and 2000. The subject property was previously developed with a theater from the 1960s until 1997. The City of San Carlos sewer system dates to the early 1900s; therefore, based on the subject property location, it is likely that former building was connected to the municipal potable water and sanitary sewer system.

No RECs were identified as a result of the review of the subject property as described in this section of the report.

#### 4.0 VICINITY RECONNAISSANCE

The subject property is located in San Carlos, San Mateo County, California, in an area characterized by residential development and commercial. Adjoining property use is summarized as follows:

Northeast: Highway 101 followed by undeveloped marsh land

**Southeast:** A office/warehouse building (1870 Industrial Way) occupied by a book store

and Amana Auto Repair, a warehouse (1850 Industrial Way) occupied by Benz Auto Body, a warehouse (1830 Industrial Way) occupied by AM Party Rentals and warehouse/office buildings (1826 Industrial Way) occupied by Airgas

**Southwest:** Industrial Way followed by a single-family residential area

**Northwest:** Extended Stay America hotel (3 Circle Star Way)

Source	Findings
Field observations	Blackstone observed no industrial, manufacturing or military operations such as outdoor chemical or hazardous waste storage or handling activities that may impact the subject property and no evidence of chemical spills, releases, or waste disposal. From accessible vantage points, Blackstone identified no outdoor chemical or waste storage, wastewater treatment facilities, or other operations that may impact the subject property and no pits, ponds or lagoons for apparent discharge and/or treatment of process water.
Environmental databases search	Adjoining and/or nearby properties identified on the environmental databases searched are discussed further in Section 7.0. None are considered RECs.

No RECs were identified as a result of the vicinity reconnaissance.

# 5.0 PHYSICAL SETTING

	Findings	Sources of Findings
Surficial Soils Beneath Subject property	Urban land	EDR Report
Depth to Bedrock	Greater than 100 feet bgs	California Water Resources Control Board (CWRCB), Geotracker website
Topography	The subject property slopes towards the northeast.	EDR Report and USGS <i>Palo Alto, CA,</i> topographic map
Elevation	Approximately 8 feet NAVD	Palo Alto, CA, topographic map
Depth to Shallow Groundwater	Approximately 8 feet bgs	CWRCB, Geotracker website
Estimated Groundwater Flow Direction	Northeast	CWRCB, Geotracker website and <i>Palo</i> <i>Alto, CA</i> , topographic map

bgs: below ground surface

EDR Report: Environmental Data Resources Database Report with GeoCheck®

NAVD: North American Vertical Datum, 1988

USGS: United States Geological Survey

No RECs were identified as a result of the physical setting records review.

#### 6.0 HISTORICAL INFORMATION REVIEW

As part of this Phase I ESA, Blackstone reviewed historical information to identify RECs associated with the historical use of the subject property and surrounding properties. Blackstone obtained historical information from interviews with subject property representatives and other individuals familiar with the subject property as well as aerial photographs, historical maps, and other *practically reviewable* standard historical sources that are considered *reasonably ascertainable*.

#### 6.1 HISTORICAL FIRE INSURANCE MAPS

Environmental Data Resources, Inc. (EDR) conducted a search of Sanborn historical fire insurance maps for the subject property and subject property vicinity. Sanborn historical fire insurance maps are scaled drawings that indicate the location and use of building structures present in a given area from as early as the late 1800s. The maps provide information regarding the development and historic use of subject property structures and can indicate the historic presence of tanks at the subject property.

According to EDR, historical fire insurance maps are not available for the subject property area. A summary of the map search is provided in Appendix B.

#### 6.2 AERIAL PHOTOGRAPHS

Aerial photographs of the subject property area were obtained from EDR. The aerial photographs are reproduced in Appendix B and are summarized as follows:

	Aerial Photograp	hs: Development/Land Uses
Year	Subject Property	Adjoining Properties
1943	The subject property appears as undeveloped marsh land. No structures are visible.	A four-lane road is located along the northeast property boundary followed by undeveloped marsh land. Undeveloped land is visible adjoining to the southeast. A dwelling and undeveloped land are visible adjoining to the southwest. Undeveloped land is visible adjoining to the northwest.
1948	The subject property appears similar to	The adjoining properties appear similar to the
	the previous photograph.	previous aerial photograph.
1958	The subject property appears similar to the previous photograph.	The northeast adjoining roadway has been expanded in the present-day Highway 101 freeway, followed undeveloped land. The present-day warehouse and undeveloped land are visible adjoining to the southeast. The present-day single-family residential area is visible to the southwest beyond Industrial Way. Undeveloped land and a commercial building are visible to the northwest.

	Aerial Photographs: Development/Land Uses		
Year	Subject Property	Adjoining Properties	
1968	A large commercial building is located in the northern portion of the subject property. The remainder of the subject property is asphalt paved.	The northwest adjoining property is developed as a portion of the commercial building located on the subject property. The present-day office and warehouses are visible adjoining to the southeast.	
1974	The subject property appears similar to the previous photograph.	The adjoining properties appear similar to the previous aerial photograph.	
1981	The subject property appears similar to the previous photograph.	The adjoining properties appear similar to the previous aerial photograph.	
1991	The subject property appears similar to the previous photograph.	The adjoining properties appear similar to the previous aerial photograph.	
1998	The present-day Circle Star Two building is visible on the northern portion of the subject property. The remainder of the subject property appears vacant.	The present-day hotel and surrounding parking area is visible adjoining to the northwest.	
2005	The present-day office towers and parking garage are visible.	The adjoining properties appear similar to the previous aerial photograph.	
2009	The subject property appears similar to the previous photograph.	The adjoining properties appear similar to the previous aerial photograph.	
2010	The subject property appears similar to the previous photograph.	The adjoining properties appear similar to the previous aerial photograph.	
2012	The subject property appears similar to the previous photograph.	The adjoining properties appear similar to the previous aerial photograph.	

**Findings:** No RECs were identified as a result of the review of historical aerial photographs.

# 6.3 HISTORICAL TOPOGRAPHIC MAPS

Historical topographic maps of the subject property area were obtained from EDR. The historical topographic maps are reproduced in Appendix B and are summarized as follows:

	Historical Topographic Maps: Development/Land Uses		
Year	Subject Property	Adjoining Properties	
1899	The entire area is depicted with white shading (indicative of undeveloped and/or agricultural land).	The northeast adjoining property is depicted with white shading followed by bay tidal flats. The southeast, southwest and northwest adjoining properties are depicted as white shading.	
1902	The subject property is depicted similar to previous topographic map.	The adjoining properties are depicted similar to previous topographic map.	
1943	The subject property is depicted similar to previous topographic map.	The adjoining properties are depicted similar to previous topographic map.	
1947	The subject property is depicted similar to previous topographic map.	The adjoining properties are depicted similar to previous topographic map.	

Project No. XXXXCA016.01

	Historical Topographic Maps: Development/Land Uses		
Year	Subject Property	Adjoining Properties	
1948	The subject property is depicted similar to previous topographic map.	The northeast adjoining property is depicted as Highway 101 followed by bay tidal flats. The southwest adjoining property beyond Industrial way is depicted as dwellings. The remaining adjoining properties are depicted as white shading.	
1953	The subject property is depicted similar to previous topographic map.	The southwest adjoining property beyond Industrial Way is depicted as pink shading, indicated developed urban land.	
1961	The subject property is depicted similar to previous topographic map.	The adjoining properties are depicted similar to previous topographic map.	
1968	The subject property is depicted similar to previous topographic map.	The adjoining properties are depicted similar to previous topographic map.	
1973	The subject property is depicted with a large undetailed commercial building.	The southeast adjoining property is depicted with commercial buildings.	
1991	The subject property is depicted similar to previous topographic map.	The adjoining property to the southeast is depicted with gray shading indicating developed urban land. The adjoining property to the southwest beyond Industrial Way is depicted as gray shading. The adjoining property to the northwest is depicted as gray shading.	
1997	The subject property is depicted similar to previous topographic map.	The adjoining properties are depicted similar to previous topographic map.	

**Findings:** No RECs were identified as a result of the review of historical topographic maps.

## 6.4 AGENCY RECORDS, INTERVIEWS AND OTHER HISTORICAL SOURCES

In accordance with ASTM E1527-13, Blackstone requested subject property history and/or regulatory information regarding the subject property from federal, state and/or local government officials. Information regarding the subject property is obtained from regulatory agency officials either by:

- 1) Conducting interviews by telephone or in-person at various federal, state and/or local agencies; or
- 2) Requesting file information via submission of an open records request to the appropriate agency contact based upon applicable agency requirements, and in accordance with the Freedom of Information Act (FOIA).

Findings from the interviews/records review are summarized below:

Source	Information Requested	Findings
United States Environmental Protection Agency (USEPA) <a href="http://www.epa.gov/superfund/sites/npl">http://www.epa.gov/superfund/sites/npl</a>	NPL and archived NPL sites	No records were identified for the subject property.
United States Geological Survey, http://water.usgs.gov	Active well information	No records were identified for the subject property.
California State Water Resources Control Board, <a href="http://geotracker.waterboards.ca.gov/">http://geotracker.waterboards.ca.gov/</a>	Aboveground and/or underground storage tanks, inspection reports, past hazardous materials spills, and/or any emergency environmental responses or incidents	No records were identified for the subject property.
California Department of Conservation Division of Oil, Gas and Geothermal Resources (DOGGR) <a href="http://www.conservation.ca.gov/">http://www.conservation.ca.gov/</a>	Oil/gas well records	Blackstone reviewed online records provided by the DOGGR regarding former oil and gas wells at the subject property. DOGGR records indicate the subject property is located in District 5, and no former oil or gas wells are associated with the subject property. No oil and gas wells, or related activities, were observed or identified in the property records.
San Mateo County Environmental Health Department (SMCEHD) http://www.smchealt h.org/	Aboveground and/or underground storage tanks (ASTs/USTs), past hazardous materials spills, and/or any emergency environmental responses or incidents	Blackstone submitted an open records request to the SMCEHD, requesting any available information regarding outstanding fire code violations on file for the subject property. Blackstone will issue a letter addendum upon receipt of responses and revise any conclusions if any local agency information is received that requires a change in the existing text of the report.
San Carlos Fire Department <a href="http://www.cityofsancarlos.org">http://www.cityofsancarlos.org</a>	Aboveground and/or underground storage tanks (ASTs/USTs), past hazardous materials spills, and/or any emergency environmental responses or incidents	Blackstone submitted an open records request to the San Carlos Fire Department, requesting any available information regarding outstanding fire code violations on file for the subject property. Blackstone will issue a letter addendum upon receipt of responses and revise any conclusions if any local agency information is received that requires a change in the existing text of the report.
San Carlos Planning Department, <a href="http://www.cityofsancarlos.org">http://www.cityofsancarlos.org</a>	Zoning information	The subject property is zoned PD9 (Planned Development)

Source	Information Requested	Findings
Department, <a href="http://www.cityofsancarlos.org">http://www.cityofsancarlos.org</a>	violations	Carlos Building Department. No environmental issues were noted in the permits reviewed.
California Water Service https://www.calwater .com/	Water supply information	According to the 2012 Water Quality Report, the water supplied to the subject property meets the requirements as established by the USEPA, state, and local authorities for lead content and other parameters for drinking water. No groundwater wells are located on or within one-half mile of the subject property.

**Findings:** No RECs were identified from the review of the local agency records, interviews, or other historical sources readily available.

# 6.5 CITY DIRECTORIES

Blackstone requested a city directory review for the current subject property address from EDR. City directories were reviewed at approximately five-year intervals for the years spanning 1977 through 2013. The subject property was identified as a multi-tenant office complex in the 2003 and 2008 directories. A previous address associated with the subject property (1777 Industrial Way) was identified as the Circle Star Theater and an associated restaurant in the 1977, 1980, 1985, and 1990 directories.

The southeast adjoining office/warehouse building (1870 Industrial Way) was listed as occupied by Family Auto Service in 2013; an Unknown Occupant in 2003; Autosport Exclusive Auto Brokers in 1999, 1995 and 1990; and Metal Machining in 1985, 1980 and 1977. The southeast adjoining warehouse building (1850 Industrial Way) was listed as occupied by Benz Auto Body in 2013, 2008 and 1999; Design Shoji in 1995; and Hobar Inc. in 1990, 1985, 1980 and 1977. The southeast adjoining warehouse building (1830 Industrial Way) was not listed in the directors searched. The southeast adjoining warehouse building (1826 Industrial Way) was listed as occupied by Airgas and Jim Lord Landscaping in 2013; Jim Lord Landscaping in 2008; Anderson Services Department, Jim Lord Landscaping, Clearview, David Crammer & Associates, Jack Warrington, Johnson Paridiso, Pauline Kennedy, Preview Properties, and Sanchez Ubaldo PHD in 2003; Ralph Clark, Sequoia District Teachers Association, Jack Warrington, and Sanchez Ubaldo PHD in 1999; ATESA USA Inc., Hugo Miranda, Sequoia District Teachers Association and Sanchez Ubaldo PHD in 1995; and Overflow Data Service and Sequoia District Teachers Association 1990, 1985, 1980 and 1977. The southwest adjoining single-family residential area beyond Industrial Way was listed in the 2013, 2008, 2003, 1999, 1995, 1990, 1985, 1980 and 1977 directories. The northwest adjoining hotel (3 Circle Star Way) was listed in the 2013 and 2003 directories. No other adjoining commercial properties were listed in directories searched.

No RECs were identified from a review of city directories.

# 6.6 ENVIRONMENTAL LIEN/AUL SEARCH

Blackstone independently obtained an environmental lien and activity & use limitation (AUL) search report from EDR. The lien and AUL report includes results from a search of available current land title records for environmental cleanup liens and other AULs, such as engineering controls and institutional controls. Review of the lien and AUL search report did not indicate evidence of environmental cleanup liens against the subject property or AULs having been filed or recorded under federal, tribal, state or local law. The lien and AUL search report is reproduced in Appendix C.

## 6.7 PREVIOUS ENVIRONMENTAL REPORTS

Blackstone was provided with the following previous environmental reports regarding the subject property:

 Moisture Assessment Report, 1 Circle Star Way/1<sup>st</sup> Floor, San Carlos, California 94070, prepared by Phoenix Environmental Consulting (PEC) for NOVO Construction, dated June 15, 2013 (2013 PEC Report)

A first floor cafe space was damaged by water leaking from a third floor restroom in 2013. Impacted building materials, including wallboard, ceiling and flooring, were removed and replaced. PEC observed the impacted areas and concluded that the moisture levels in the remaining materials were between 0% to 4% and gave approval for reconstruction to proceed.

 Mold Clearance Report, 1 Circle Star Way/1st Floor, San Carlos, California 94070, prepared by The Cohen Group (CG) for Orchard Construction and San Mateo County Human Resources Department, dated July 22, 2013 (2013 CG Report)

CG conducted post remediation sampling in the water-damaged areas of the café at 1 Circle Star Way. CG concluded that remediation of the water-impacted areas was successful and only one reading of slightly elevated Penicillium/Aspergillus was detected in the kitchen.

The previous reports are provided in Appendix D.

# 6.8 HISTORICAL INFORMATION CONCLUSIONS

Reasonably ascertainable historical information indicates the subject property was undeveloped land from at least 1899 until developed, along with the northwest adjoining property, with the Circle Star Theater and associated surface parking in the early 1960s. The theater was demolished in 1997, and the present-day buildings and parking garage were constructed on the subject property in phases between 1998 and 2000.

The northwest adjoining property was undeveloped land until the early 1960s, when it was developed as a parking area and a portion of the Circle Star Theater building (extending from the subject property). Following the demolition of the theater and associated parking area in

1997, the present-day hotel and surface parking lot were developed by 1998. A roadway was initially constructed along the northeastern property boundary by the 1940s, and expanded into the present-day Highway 101 freeway (8-lane divided road) in the 1950s. The northeast adjoining land area beyond the Highway 101 freeway has historically been undeveloped marsh land. The southeast adjoining office and warehouse buildings were constructed between 1948 and 1968. The southwest adjoining single-family residential area beyond Industrial Way was constructed between 1943 and 1948.

No RECs were identified as a result of the historical records review.

#### 7.0 ENVIRONMENTAL DATABASE SEARCH AND REVIEW

EDR provided Blackstone a search report of federal, state, local, tribal and proprietary environmental databases to determine the environmental regulatory status of the subject property, adjoining facilities, and facilities identified within the specified approximate minimum search distance (AMSD) of the subject property. ASTM Standard E 1527-13 establishes the distance from the subject property that each database is searched. The database search report, including the date and a detailed description of each database searched, is provided in Appendix E.

The federal, state, local, tribal and proprietary databases searched, the search distances specified for each database, and the results of the environmental database search are summarized as follows:

# 7.1 FEDERAL, STATE, LOCAL, TRIBAL AND PROPRIETARY DATABASES

Blackstone reviewed the following databases:

Standard Environmental Record Sources	Search Distance
Federal Databases	
NPL: National Priority List Sites	1.0 mile
Proposed NPL: Proposed National Priority List Sites	1.0 mile
Delisted NPL: National Priority List Deletions	0.5 mile

The results of the database search are summarized as follows:

## **SUBJECT PROPERTY:**

Not listed

#### ADJOINING OR FACILITIES IN CLOSE PROXIMITY:

Family Auto Services/Autosports/Buggie Works/California Concepts (1860-70 Industrial Road) adjoins the subject property to the southeast in an estimated upgradient direction based on inferred groundwater flow. According to the EDR Report, these businesses are listed in the San Mateo County Business Inventory (BI) database. The BI database indicates these facilities maintained Hazardous Material Business Plans, Spill Prevention, Emergency Response, Training and Closure Plans. According to the database, Family Auto Services stored motor vehicle fuels and generated waste solvents; Autosports generated less than 27-gallon of an unspecified waste; Buggie Works Services stored motor vehicle fuels and generated waste solvents; and California Concepts generated less than 27-gallon of an unspecified waste. No violations have been reported and none of these businesses are detailed as a RCRA-SQG or LQG. No releases have been identified in association with these businesses. No evidence of a spill or release was observed by Blackstone. These businesses are no longer located at this address. Based upon the regulatory status and local file information included in the database, no regulatory file review is warranted and these businesses are not considered a REC.

Hobar Co, Inc. (Hobar)/Benz Auto Body (Benz) (1850 Industrial Road) adjoins the subject property to the southeast in an estimated upgradient direction based on inferred groundwater flow. This location is listed in the RCRA-SQG and BI databases. According to the EDR Report, Hobar was listed as a RCRA-SQG. The RCRA status was transferred to Hobar in 1986, and no violations were reported. Hobar no longer is located at this address. Benz Auto Body is listed in the BI database, and is the current occupants. Benz stores motor vehicle fuels and generates less than 27-gallon of an unspecified waste. No releases have been identified in association with these businesses. No evidence of a spill or release was observed by Blackstone. Based upon the regulatory status, no regulatory file review was warranted and these businesses are not considered a REC.

Airgas (1826 Industrial Road) adjoins the subject property to the southeast in an estimated upgradient direction based on inferred groundwater flow. This location is listed in the BI database. According to the EDR Report, Airgas generates and recycles waste solvents. Airgas also stores less than 219 gallons, 1,999 pounds and 879 cubic feet of an unspecified chemicals. No releases have been identified in association with this business. No evidence of a spill or release was observed by Blackstone. Based upon

the regulatory status, no regulatory file review was warranted and this business is not considered a REC.

Performance Fabrication (PF) (1701 Industrial Road) is located approximately 150 feet west of the subject property in an estimated crossgradient direction based on inferred groundwater flow. According to the EDR Report, PF is listed in the BI database. PF stores motor vehicle fuels and generates less than 27-gallon of an unspecified waste. No releases have been identified in association with this business. Based upon the crossgradient location and regulatory status, no regulatory file review is warranted and this business is not considered a REC.

Mics Auto Body (MICS) (1800 Industrial Road) is located approximately 150 feet southeast in an estimated upgradient direction based on inferred groundwater flow. This located is listed in the RCRA-SQG database. According to the EDR Report, MICS was listed as a RCRA-SQG. The RCRA status was grated to Mics in 1989, and no violations were reported. Mics is no longer is located at this address. No releases have been identified in association with this business. No evidence of a spill or release was observed by Blackstone. Based upon the regulatory status, no regulatory file review is warranted and this business is not considered a REC.

#### NON-ADJOINING FACILITIES WITHIN APPROXIMATE MINIMUM SEARCH DISTANCE:

As detailed in the EDR Report, several facilities on various databases are within the ASTM E 1527-13 Approximate Minimum Search Distance (AMSD). Based on factors such as distance to the subject property, topography, media affected (surface water, soil, soil vapor, groundwater, or air), depth to groundwater, anticipated groundwater flow direction away from the subject property, and/or a "Case Closed" and/or "No Further Action (NFA)" regulatory status, these non-adjoining facilities within the AMSD unlikely to have current or former releases of hazardous substances and/or petroleum products that could migrate to the subject property and are not considered RECs.

# 7.2 UNMAPPABLE FACILITIES

Due to inadequate address information or other erroneous facility information, several facilities listed in the environmental databases searched could not be plotted by EDR on a radius map. However, these facilities are still identified in the EDR report by grouping them into an unmappable facility summary. Blackstone reviewed this summary to determine if any of the listed facilities include or adjoin the subject property. The unmappable facility listings are summarized as follows:

# **SUBJECT PROPERTY:**

Not listed

## **ADJOINING FACILITIES:**

None listed

No facilities listed on the unmappable subject property summary are located on or adjoining the subject property.

## 7.3 AFFIRMATION

Blackstone's conclusions based on the EDR report are limited to the accuracy of that report. To the extent possible, Blackstone uses field observations to verify the information or identify errors and inconsistencies in the search report regarding the listed facilities in the immediate vicinity of the subject property. The provided database summary is sufficiently complete and current to be used as a source to satisfy the regulatory database requirements outlined in ASTM Standard E 1527-13.

## 7.4 ENVIRONMENTAL DATABASE SEARCH AND REVIEW CONCLUSIONS

Based upon Blackstone's review of the EDR database report, no regulatory file reviews are warranted. No RECs were identified as a result of the environmental database search and review.

# 8.0 SUBJECT PROPERTY INSPECTION

Name of Inspector: David Arritt

Date of Subject Property Inspection: March 4, 2014

SUBJECT PROPERTY REPRESENTATIVE			
Name	Years Associated with		
	Property	Subject Property	
Ms. Debbie Kaiser	Property Manager	2 years	

The subject property inspection consisted of a walkover of the subject property perimeter and exterior subject property areas, and a walk-through of the common areas, storage areas, mechanical areas, and representative office areas. Building interiors were walked through at the direction of the Subject Property Representative. Not all interior building areas were observed. Furthermore, during the subject property inspection, Blackstone did not inspect inaccessible areas of the subject property including crawl spaces, beneath parked motor vehicles, a construction trailer, storage containers, under manholes or areas of dense vegetation. The adjoining properties were visually observed from curbside without being entered. There is no reason to believe the inability to inspect these areas would alter the findings or recommendations set forth in this report or be considered a significant data gap.

# 8.1 UNDERGROUND STORAGE TANKS (USTS)

Number of USTs	Capacity (gallons)	Contents	Location	Status/Notes	REC
None					No

No physical evidence or records of current or former USTs was identified during the subject property inspection. Subject Property Representative was unaware of current or former USTs.

# 8.2 ABOVEGROUND STORAGE TANKS (ASTS)

Number of ASTs	Capacity (gallons)	Contents	Location	Status/Notes	REC
1	4,000	Diesel	Southeast exterior in an	The AST stores fuel for an emergency generator.	No
			enclosure		

The subject property maintains a 4,000-gallon AST adjacent to an emergency generator. The AST is steel encased in concrete and is located within an enclosure with a 5,000-gallon spill containment capacity. The subject property maintains a Spill Prevention Control and Countermeasures Plan (SPCCP) approved by the County of San Mateo in 2007. No leaks or spills have been reported and Blackstone observed no evidence of prior leaks or spills.

No physical evidence or records of other current or former ASTs was identified during the subject property inspection. Subject Property Representative was unaware of other current or former ASTs.

#### 8.3 CHEMICALS AND MATERIALS USAGE

The following section describes non-bulk (55-gallons or less) chemical and petroleum storage at the subject property. Where applicable, all bulk fixed chemical and petroleum product storage (i.e. USTs and/or ASTs) are discussed in Sections 8.1 and 8.2.

Chemical or Material	Use	Container Type	Location	REC
General janitorial supplies	General maintenance, paints, cleaners, degreaser, adhesives,	5-gallon or smaller	Maintenance storage room located in garage and temporarily stored within work areas of Circle Star 2.	No

No evidence of surface staining, spills, or releases was apparent in the chemical storage areas. According to the Subject Property Representative, no releases of chemicals or materials requiring emergency response and/or agency notification have occurred at the subject property.

#### 8.4 HAZARDOUS WASTES

Hazardous Waste	Generated By	Storage Container	Storage Location	Disposal Details	REC
None					No

No physical evidence or records of on-subject property hazardous waste generation or disposal was identified during the subject property inspection. Subject Property Representative was unaware of any on-subject property hazardous waste disposal.

#### 8.5 NON-HAZARDOUS WASTES

Non- Hazardous Waste	Generated By	Storage Container	Storage Location	Disposal Details	REC
Domestic	Tenants	Three	Southeast	Removed by	No
		dumpsters	Exterior	contractor	

No physical evidence or records of on-subject property non-hazardous waste generation or disposal was identified during the subject property inspection. Subject Property Representative was unaware of any on-subject property non-hazardous waste disposal.

# 8.6 POLYCHLORINATED BIPHENYLS (PCBS)

PCBs can be present in coolants or lubricating oils used in older electrical transformers, hydraulic systems, and other similar equipment. The 1976 Toxic Substances Control Act (TSCA) extended regulatory control over the use of PCBs to the United States Environmental Protection Agency (USEPA). In November 1979, the USEPA generally prohibited the domestic manufacture of PCBs in electromagnets, transformers, and heat-transfer and hydraulic equipment.

Equipment	Location	Owner	Condition	Status/Notes	REC
Pad-mounted	Exterior	PG&E	Good	No evidence of leaks	No
transformers					
Seven hydraulic	Circle Star 1	Subject	Good	No evidence of leaks,	No
elevators	(3); Circle	Property		recent maintenance	
	Star 2 (3);			records were	
	Parking			reviewed with no	
	Garage (1)			issues reported.	

The transformers are owned and maintained by PG&E and were observed in good condition, with no evidence of fluid release. Based on the installation dates of the electrical transformers (1998 and 2000), the presence of PCB-containing fluid is unlikely. In addition, should fluid spills or releases from the electrical transformers occur, associated remediation efforts are typically the responsibility of the transformer owner (PG&E) per Federal regulation (40 CFR 761.125). As such, the transformers are not considered a REC.

Blackstone observed seven hydraulically driven passenger elevators. There was no observed visual evidence of leaking fluid from the elevator hydraulic equipment, and the Subject Property Representative did not have knowledge of fluid leakage. Based upon the presumed installation date of the hydraulic elevators (1998 and 2000), the presence of PCB-containing hydraulic fluid is unlikely. As such, the elevator equipment is not considered to be a REC.

#### 8.7 WASTEWATER DISCHARGES

Туре	Generated By	Discharged To	Status/Notes	REC
Sanitary	Tenants and	Municipal sanitary sewer	No issues	No
	staff	system		
Kitchen Grease	Café at	3,000-gallon grease	Contents are removed by a	No
	Circle Star	interceptor pit in parking	licensed contractor	
	One	area adjacent to Circle Star		
		One		

No physical evidence or record of former or current septic systems, cesspools, clarifiers, or oil/water separators. In addition, no physical evidence of floor drains, trench drains, or sumps were identified during the subject property inspection. Subject Property Representative was unaware of such features on the subject property.

#### 8.8 STORMWATER DISCHARGES

Discharged From	Discharged To	Status/Notes	REC
Roof through	Off-subject property	No issues	No
external gutters	municipal storm water		
and downspouts	system		
Exterior subject	Off-subject property	No issues	No
property surfaces	municipal storm water		
	system		

No on-subject property stormwater retention ponds were observed. Subject Property Representative was unaware of such features on the subject property.

# 8.9 PITS, PONDS, AND LAGOONS (ON-SUBJECT PROPERTY PROCESS WATER DISCHARGE)

	Туре	Contents	Location	Status/Notes	REC
Ī	None				No

No pits, ponds or lagoons used for process water discharge were observed at the subject property. Subject Property Representative was unaware of such features on the subject property.

## **8.10 WELLS**

Туре	Location	Status/Notes	REC
None			No

No physical evidence or records of groundwater monitoring wells, oil and gas wells, dry wells, injection wells, extraction wells, vapor wells, or groundwater production wells was identified during the subject property inspection, and there is no record of historic wells. Subject Property Representative was unaware of such features on the subject property.

#### 8.11 UNDERGROUND PRODUCT PIPELINES

Туре	Location	Status/Notes	REC
None			No

No physical evidence or records of underground product pipelines carrying petroleum or other hazardous substances were identified during the subject property inspection. Subject Property Representative was unaware of on-subject property product pipelines.

#### **8.12 ODORS**

Odors	Location	Status/Notes	REC
None			No

No unusual odors indicative of environmental concerns were identified during the subject property inspection. Subject Property Representative was unaware of such odors at the subject property.

# 8.13 POOLS OF LIQUID

Pools of Liquid	Location	Status/Notes	REC
None			No

No pools containing liquids indicative of environmental concerns were identified during the subject property inspection. Subject Property Representative was unaware of pools containing liquids at the subject property.

#### 8.14 STRESSED VEGETATION OR STAINED SURFACES

Stressed Vegetation or Stained Surfaces	Location	Status/Notes	REC
None			No

No stressed vegetation was observed. Subject Property Representative was unaware of stressed vegetation or stained surfaces.

# 8.15 SUBJECT PROPERTY INSPECTION CONCLUSIONS

No RECs were identified in connection with the subject property as a result of the subject property inspection.

#### 9.0 ASTM NON-SCOPE CONSIDERATIONS

Blackstone performed the following client-specific activities to identify ASTM *Non-Scope Considerations* (*Business Environmental Risk Issues*) in addition to the ASTM requirements and as required per the Agreement.

#### 9.1 AIR EMISSIONS

Regulated Emissions Source	Discharged To	Potential Impacts	Status/Notes	REC
Emergency	Air	None	A permit has been issued	No
Generator			by the Bay Area Air	
			Quality Management	
			District for operation of	
			the emergency generator	

# 9.2 ASBESTOS-CONTAINING MATERIALS (ACM)

Blackstone conducted a limited visual survey for the presence of typically suspect ACM at the subject property. Suspect ACM identified by Blackstone includes vinyl floor tile and associated mastic, drywall systems (drywall wallboard/joint compound and tape), baseboard mastic, ceiling tiles, and pipe insulation. The suspect materials identified were observed in good condition and assessed as both friable and non-friable materials. Hidden materials such as those inside walls, inaccessible attics, crawl spaces, and inside ductwork were not evaluated.

This should not be construed as a comprehensive asbestos survey for pre-demolition or prerenovation purposes. Therefore, regardless of the construction date, prior to renovation or demolition activities at the subject property, the National Emissions Standards for Hazardous Air Pollutants (NESHAP) may require that regulated ACM be identified (through sampling or building records) and handled in accordance with applicable USEPA, OSHA, state, and city regulations. Subject to the foregoing, ACM is not considered a significant environmental concern for the subject property.

# 9.3 LEAD-BASED PAINT (LBP)

Considering the subject property buildings were developed after the recognized 1978 LBP date that use of lead-based paint was banned, the presence of LBP is unlikely and sampling of painted surfaces was not conducted as part of the scope of this assessment. The paint throughout the buildings was in good condition, and the buildings are not for residential use. Lead-based paint is not considered a significant environmental concern for the subject property.

#### 9.4 RADON GAS

A review of records regarding radon concentrations in San Mateo County, California, was conducted to determine if concentrations of radon in the general area of the subject property are within the USEPA guidelines. The USEPA uses a continuous exposure level of 4.0 pCi/L (picoCuries per liter of air) or greater as a guidance level at which further evaluation and potential remedial actions are recommended.

According to USEPA Office of Radiation and Indoor Air information/mapping, the subject property is located within a Radon Zone Level 2. This zone has a predicted average indoor radon gas screening level between 2.0 pCi/L and 4.0 pCi/L, which is within USEPA guidance levels. Based on the Radon Zone Level 2 designation and absence of sub-grade structures designed for human occupancy at the subject property, radon is not considered an environmental concern and no further evaluation of radon is recommended.

#### 9.5 WETLANDS

As defined by the USEPA and U.S. Army Corps of Engineers (USACE), wetlands are "those areas that are inundated or saturated by surface or groundwater at a frequency and duration sufficient to support, and that under normal circumstances do support, a prevalence of vegetation typically adapted for life in saturated soil conditions."

Wetlands possess three essential characteristics: (1) hydrophytic vegetation; (2) hydric soils; and (3) hydrology. All three characteristics must be prevalent to document an area as a jurisdictional wetland.

Wetlands			
Information Source	Findings		
National Wetlands Inventory (NWI) on-line Wetland Mapper: (http://107.20.228.18/Wetlands/WetlandsMapper.html)	No mapped, potential federal wetlands are located at the subject property.		
Field observations	No vegetation or ponded areas that are characteristic of possible wetlands were observed at the subject property.		

# 9.6 APPARENT MOLD GROWTH (AMG) AND WATER INTRUSION

As part of this subject property assessment, Blackstone performed the following tasks: looked for evidence of AMG and water intrusion in the areas surveyed during the subject property assessment; made inquiries of property management regarding past and current leaks or known mold issues; made inquiries of property management whether there have been occupant complaints regarding health problems, musty odors or water leaks; observed areas where significant leaks were reported, if any; and conducted a representative visual/olfactory survey for evidence of current or past water leakage and/or mold.

No AMG or evidence of water intrusion was observed within the inspected areas of the subject property building. The Subject Property Representative indicated a first floor cafe space at 1 Circle Star Way was damaged by water leaking from a third floor restroom in 2013. As previously discussed in section 6.7, impacted building materials, including wallboard, ceiling and flooring, were removed and replaced; post remediation sampling in the water-damaged areas of the café at 1 Circle Star Way was conducted; and remediation of the water-impacted areas was successful.

#### 9.7 LEAD IN DRINKING WATER

California Water Service (CWS) provides drinking water to the subject property. The CWS 2012 Annual Drinking Water Quality Report indicates the municipal water system meets the requirements as established by the USEPA, state, and local authorities for lead content in drinking water.

#### 9.8 POTABLE/IRRIGATION GROUNDWATER WELL SURVEY

Blackstone contacted the CWS and performed an inspection of the subject property. According to the CWS and subject property inspection, no groundwater wells are located on or within one-half mile of the subject property.

#### 9.9 OIL AND GAS SURVEY

Blackstone reviewed records provided by the California Department of Conservation Division of Oil, Gas and Geothermal Resources (DOGGR) regarding current and former oil and gas wells at the subject property. DOGGR records indicate that no current or former oil or gas wells are associated with the subject property, or located in the subject property vicinity.

#### 10.0 CONCLUSIONS

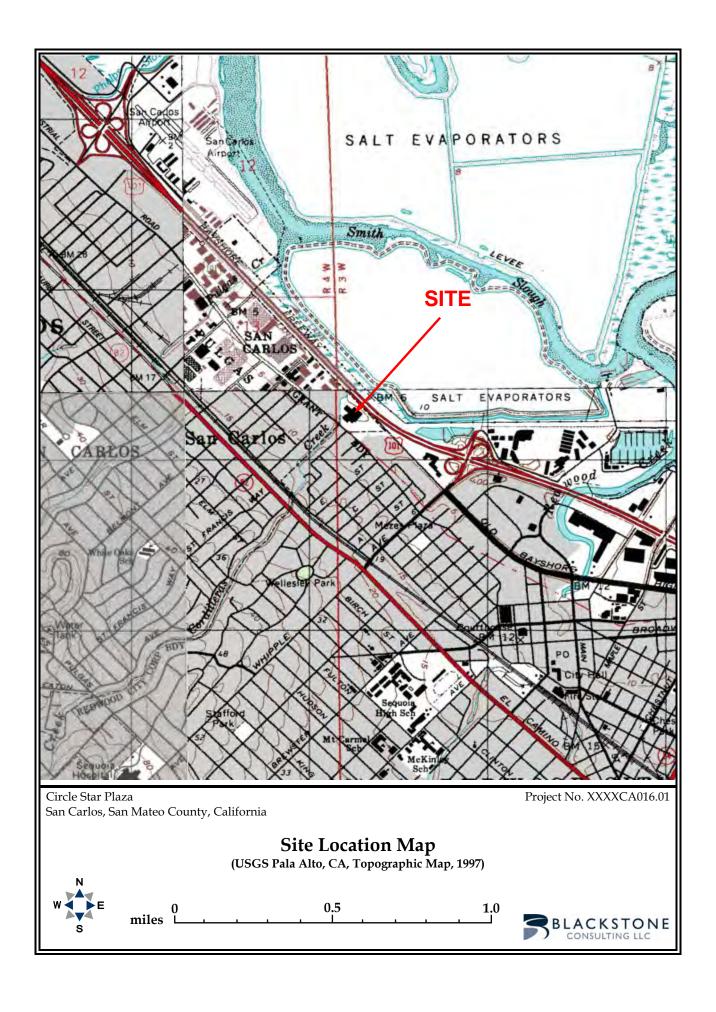

Blackstone performed a Phase I ESA of the subject property in conformance with the scope and limitations of ASTM Standard Practice E 1527-13, the regulations at 40 CFR Part 312, and the Master Technical Services Agreement (MTS) between Post & Schell, P.C. (Post & Schell) and Blackstone, dated April 19, 2012. Any exceptions to or deletions from this practice are described in Sections 1.2 through 1.4 of this report. This assessment has revealed no evidence of *recognized environmental conditions* (*RECs*) in connection with the subject property.

### 11.0 SIGNATURES OF ENVIRONMENTAL PROFESSIONALS

This Phase I Environmental Site Assessment (ESA) Report documents the research methodology used by qualified environmental professionals of Blackstone to identify recognized environmental conditions using the scope and limitations of ASTM Standard Practice E 1527-13 and the Master Technical Services Agreement (MTS) between Post & Schell, P.C. (Post & Schell) and Blackstone, dated April 19, 2012.

We declare that, to the best of our professional knowledge and belief, we meet the definition of *Environmental Professional* as defined in §312.10 of 40 CFR 312, and we have the specific qualifications based on education, training, and experience to assess a site of the nature, history, and setting of the subject property. We have developed and performed all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Blackstone Consulting, LLC were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

# **EDR** Environmental Lien and AUL Search

#### **EDR Environmental Lien and AUL Search**

The EDR Environmental Lien and AUL Search Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address information to:

- · search for parcel information and/or legal description;
- · search for ownership information;
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc.;
- access a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument(s) (title, parties involved, and description); and
- provide a copy of the deed or cite documents reviewed.

Thank you for your business.

Please contact EDR at 1-800-352-0050 with any questions or comments.

### LEGAL DESCRIPTION

#### PARCEL ONE:

ALL THAT REAL PROPERTY SITUATE IN PARTLY IN THE CITY OF SAN CARLOS AND PARTLY IN THE CITY OF REDWOOD CITY, COUNTY OF SAN MATEO, STATE OF CALIFORNIA, BEING A PORTION OF PARCEL I AND PARCEL II AND BEING ALL OF PARCEL III, PARCEL IV AND PARCEL V, AS DESCRIBED IN THE TRUSTEE'S DEED FROM SEASIDE FINANCIAL CORPORATION TO CALIFORNIA COMMERCE BANK, RECORDED JUNE 9, 1995, AS SERIES NUMBER 95059343, OFFICIAL RECORDS OF SAN MATEO COUNTY, DESCRIBED AS FOLLOWS:

BEGINNING AT THE SOUTHWESTERLY CORNER OF SAID PARCEL II AT THE CENTERLINE OF INDUSTRIAL WAY (80 FEET WIDE); THENCE ALONG THE WESTERLY LINE OF SAID PARCEL II NORTH (THE BEARING NORTH BEING USED FOR THE PURPOSE OF THIS DESCRIPTION) 53.02 FEET TO A POINT DISTANT 40.00 FEET NORTHEASTERLY, MEASURED AT A RIGHT ANGLE, FROM SAID CENTERLINE OF INDUSTRIAL WAY; THENCE LEAVING SAID WESTERLY LINE OF PARCEL II PARALLEL WITH AND DISTANT 40.00 FEET NORTHEASTERLY, MEASURED AT A RIGHT ANGLE. FROM SAID CENTERLINE OF INDUSTRIAL WAY SOUTH 48° 58' 53" EAST 220.17 FEET; THENCE LEAVING SAID PARALLEL LINE NORTH 48° 01' 00" EAST 133.64 FEET; THENCE NORTH 41° 59' 00" WEST 220.81 FEET; THENCE NORTH 78.95 FEET; THENCE NORTH 48° 01' 00" EAST 132.19 FEET; THENCE NORTH 41° 59' 00" WEST 170.00 FEET; THENCE NORTH 48° 01' 00" EAST 41.50 FEET; THENCE NORTH 41° 59' 00" WEST 49.07 FEET TO A POINT FROM WHICH THE RADIAL CENTER OF A CURVE HAVING A RADIUS OF 60.00 FEET BEARS NORTH 39° 21' 02" WEST; THENCE SOUTHWESTERLY ALONG SAID CURVE THROUGH A CENTRAL ANGLE OF 21° 41' 29", AN ARC DISTANCE OF 22.72 FEET; THENCE SOUTH 72° 20' 27" WEST 33.28 FEET TO A TANGENT CURVE TO THE LEFT HAVING A RADIUS OF 70.00 FEET; THENCE ALONG SAID CURVE THROUGH A CENTRAL ANGLE OF 72° 20' 20", AN ARC DISTANCE OF 88.38 FEET TO THE WESTERLY LINE OF SAID PARCEL I; THENCE ALONG THE PERIMETER OF SAID PARCEL I THE FOLLOWING FOUR (4) COURSES: 1) NORTH 114.94 FEET, 2) NORTH 46° 30' 48" EAST 126.81 FEET: 3) SOUTH 41° 59' 00" EAST 1187.08 FEET: 4) SOUTH 89° 08' 07" WEST 254.81 FEET TO THE MOST EASTERLY CORNER OF SAID PARCEL V; THENCE ALONG THE PERIMETER OF SAID PARCEL V THE FOLLOWING TWO (2) COURSES: 1) SOUTH 46° 38' 37" WEST 42.11 FEET; 2) NORTH 43° 21' 23" WEST 38.58 FEET TO THE MOST WESTERLY CORNER THEREOF; THENCE ALONG THE SOUTHERLY LINE OF SAID PARCEL I AND PARCEL III SOUTH 89° 08' 07" WEST 117.62 FEET TO THE MOST EASTERLY CORNER OF SAID PARCEL IV: THENCE ALONG THE PERIMETER OF SAID PARCEL IV THE FOLLOWING TWO (2) COURSES: 1) SOUTH 46° 38' 37" WEST 74.14 FEET TO A POINT FROM WHICH THE RADIAL CENTER OF A CURVE HAVING A RADIUS OF 3674.71 FEET BEARS SOUTH 44° 16' 34" WEST; 2) SOUTHWESTERLY

ALONG SAID CURVE THROUGH A CENTRAL ANGLE OF 01° 06' 45", AN ARC DISTANCE OF 71.35 FEET TO THE SOUTHERLY LINE OF SAID PARCEL III; THENCE ALONG SAID SOUTHERLY LINE SOUTH 89° 08' 07" WEST 56.06 FEET TO THE MOST SOUTHWESTERLY CORNER OF SAID PARCEL III; THENCE ALONG THE SOUTHWESTERLY LINE OF SAID PARCEL II, PARCEL I AND PARCEL II NORTH 48° 58' 53" WEST 391.05 FEET TO THE POINT OF BEGINNING.

#### EXCEPTING FROM PARCEL I THE FOLLOWING DESCRIBED PARCEL:

BEGINNING AT A POINT IN THE NORTHERLY BOUNDARY LINE OF THE LANDS CONVEYED IN THAT CERTAIN GRANT DEED FROM SAUL WITSCHNER, ET AL, TO METAL MACHINE MANUFACTURING, INC., RECORDED OCTOBER 3, 1958, IN BOOK 3468 AT PAGE 89 (80537-Q), OFFICIAL RECORDS OF SAN MATEO COUNTY, DISTANT THEREON, NORTH 89° 08' 07" EAST (CALLED NORTH 89° 08' EAST IN SAID TRUSTEE'S DEED RECORDED AS SERIES NUMBER 95059343) 105.49 FEET FROM THE MOST WESTERLY CORNER OF SAID LANDS; THENCE FROM SAID POINT OF BEGINNING, LEAVING SAID NORTHERLY BOUNDARY LINE, NORTH 46° 38' 37" EAST 86.73 FEET; THENCE SOUTH 43° 21' 23" EAST 79.45 FEET TO SAID NORTHERLY BOUNDARY LINE; THENCE ALONG SAID LAST MENTIONED LINE, SOUTH 89° 08' 07" WEST 117.62 FEET TO THE POINT OF BEGINNING.

#### ALSO EXCEPTING THEREFROM THE FOLLOWING DESCRIBED PARCEL:

COMMENCING AT THE MOST EASTERLY CORNER OF PARCEL I AS SAID PARCEL IS DESCRIBED IN THAT CERTAIN GRANT DEED FROM ROBINWOOD LANE CORPORATION TO RUSSELL A. MARGIOTTA AND DEBORAH B. MARGIOTTA, AS TRUSTEES UNDER DECLARATION OF TRUST DATED MAY 6, 1981, RECORDED AUGUST 17, 1984 AS SERIES NO. 84091556, OFFICIAL RECORDS OF SAN MATEO COUNTY; THENCE SOUTHWESTERLY ALONG THE LINE COMMON TO SAID PARCEL I (SERIES NUMBER 84091556), AND AFORESAID PARCEL I (SERIES NUMBER 95059343), SOUTH 46° 30' 48" WEST 15.04 FEET TO THE POINT OF BEGINNING; THENCE LEAVING SAID COMMON LINE, SOUTH 15° 03' 06" EAST 44.56 FEET TO A TANGENT CURVE TO THE RIGHT HAVING A RADIUS OF 45.00 FEET; THENCE ALONG SAID CURVE THROUGH A CENTRAL ANGLE OF 84° 16' 48", AN ARC DISTANCE OF 66.19 FEET; THENCE SOUTH 69° 13' 42" WEST 40.72 FEET TO A TANGENT CURVE TO THE LEFT HAVING A RADIUS OF 50.00 FEET; THENCE ALONG SAID CURVE THROUGH A CENTRAL ANGLE OF 33° 51' 48", AN ARC DISTANCE OF 29.55 FEET; THENCE SOUTH 35° 21' 54" WEST 7.01 FEET TO THE WESTERLY LINE OF SAID PARCEL I (SERIES NUMBER 95059343); THENCE ALONG SAID WESTERLY LINE NORTH 57.84 FEET TO SAID LINE COMMON TO SAID PARCEL I (SERIES NO. 84091556), SAND AFORESAID PARCEL I (SERIES NUMBER 95059343); THENCE NORTHEASTERLY ALONG SAID COMMON LINE, NORTH 46° 30' 48" EAST 111.77 FEET TO THE POINT OF BEGINNING.

THE BEARING "NORTH" OF THE WESTERLY LINE OF SAID PARCEL I AS DESCRIBED IN THE TRUSTEE'S DEED FROM SEASIDE FINANCIAL CORPORATION

TO CALIFORNIA COMMERCE BANK, RECORDED JUNE 9, 1995, AS SERIES NUMBER 95059343, OFFICIAL RECORDS OF SAN MATEO COUNTY, WAS TAKEN AS THE BASIS OF BEARINGS FOR THIS DESCRIPTION.

THE ABOVE REAL PROPERTY IS FURTHER DESCRIBED AS PARCEL I AS SHOWN ON THAT CERTAIN APPROVAL OF LOT LINE ADJUSTMENT RECORDED JUNE 25, 1997, UNDER RECORDER'S INSTRUMENT NO. 97076673 OF OFFICIAL RECORDS OF SAN MATEO COUNTY, CALIFORNIA.

#### PARCEL TWO:

EASEMENTS AS SET FORTH IN SECTION 4.1 AND 4.2 OF THAT CERTAIN DECLARATION OF COVENANTS, CONDITIONS AND RESTRICTIONS DATED JUNE 24, 1997, BY AND BETWEEN MOZAD, L.P., A CALIFORNIA LIMITED PARTNERSHIP AND HOMESTEAD VILLAGE INCORPORATED, A MARYLAND CORPORATION, RECORDED JUNE 25, 1997, INSTRUMENT NO. 97076680, SAN MATEO COUNTY RECORDS, AS AMENDED BY AMENDMENT NO. 1 TO DECLARATION OF COVENANTS, CONDITIONS AND RESTRICTIONS, DATED APRIL 20, 2000, RECORDED APRIL 20, 2000, INSTRUMENT NO. 2000-045598, SAN MATEO COUNTY RECORDS.

#### PARCEL THREE:

LANDSCAPING AND MAINTENANCE APPURTENANT TO PARCEL I ABOVE AS CREATED IN THAT CERTAIN "DECLARATION ESTABLISHING EASEMENTS, COVENANTS & RESTRICTIONS RUNNING WITH THE LAND" RECORDED JUNE 25, 1997 AS INSTRUMENT NO. 97-076684 OF OFFICIAL RECORDS.

### CERTIFICATE OF ACCEPTANCE

THIS IS TO CERTIFY that the interest in real property conveyed by the Grant Deed dated

March \_\_\_10\_2011, from CIRCLE STAR INVESTORS, LLC, a Delaware limited liability company, to

the COUNTY OF SAN MATEO, a political subdivision of the State of California, for Assessor's Parcel

Numbers 046-240-180 and 052-103-170, together with all appurtenant rights and the improvements

thereon, and commonly known as One Circle Star Way, San Carlos, California and 1717 Industrial Way,

Redwood City, California, is hereby accepted on behalf of the County of San Mateo as authorized by

Resolution No. 071219 of the BOARD OF SUPERVISORS OF THE COUNTY OF SAN MATEO

adopted on Tuesday, January 25, 2011, and the Grantee consents to recordation thereof by its duly

authorized officer.

RE: 1 Circle Star Way - 1st Floor

San Carlos, CA 94070

Dear Mr. Takata:

In accordance with the contract between Phoenix Environmental Consulting and **Restoration**Management Company Moisture Assessment services were performed at the aforementioned property on June 14, 2013.

We urge you to read the Moisture Assessment Report in its entirely and to contact the undersigned with any questions or concerns you may have about the report. Our findings, conclusions recommendations and limitations are dicussed in the report.

We appreciate the opportunity to provide our services and look forward to assisting you with your future environmental needs.

Sincerely,

Greg Olachea,

Testing Date: June 14, 2013

Report Date:

June 15, 2013

### Outline of Findings

Phoenix Environmental Consulting was contracted to perform third party verification of current moisture levels in previously damaged construction materials prior to replacement of new. The commercial office building is a 4 story structure comprising approximately 103,000sqft of space. Our inspection, for this report, was limited to the 1st floor areas as presented to PEC by Restoration Management and Novo Construction. Drying services were performed by contractor: **RESTORATION MANAGEMENT COMPANY prior to our inspection**. Areas in the kitchen, and corridor are scheduled for removal due to visible mold growth. Environmental services included a visual and tactile examination of materials using industry standard moisture meters and documenting photographs. The source of the water loss was the third floor restroom.

Areas of concern included all areas where remediation activities had occured. Many of the areas inspected consisted of multiple layers of wallboard, up to three (3) layers in some locations and on all floors. Two types of wallboard were noted - "white" and "green" coated on each floor. Typical green coating indicates anti microbial additives (in most cases) and non treated white wallboard.

Inspection of wallboard on the first floor consistently showed moisture levels ranging from 0% to 4% and green wallboard showing 1% to 3% throughout the second floor areas. Dry out methods were still in operation during inspection.

### Summary of Results

PEC has confirmed through visual and tactile inspection that the remediated areas are dry and within acceptable moisture levels. Work activities were still in progress in the kitchen, common corridor, and east of the elevator lobby. These areas show mold growth and are covered by plastic. It is our opinion that reconstruction may proceed based on findings as presented during

the day of inspection of the remaining areas throughout the 1st floor and provided no further leaks have occurred in between the time of inspection and reconstruction.

NOTE: This report is limited to those areas opened by Restoration Management Company on the first floor where wallboard had been removed or is scheduled for removal.

### Limitations

PEC makes no representations regarding the legal status of this project. All questions regarding the liability of any entity or person should be addressed by a qualified legal professional.

PEC makes no representations regarding the health of any past, present, or future occupants of the structure. All questions regarding the health of any entity or person should be addressed by a qualified medical professional.

Re: Site Inspection and Post-Remediation Air Sampling at #1 Circle Star Way Café

Dear Mr. Takamoto and Ms. Kellie:

Per the remediation protocol established for this project (see attached), I conducted a post-remediation site inspection and collected air samples for mold spore particulate inside the remediation containment structures located in the first floor Café areas of #1 Circle Star Way, San Carlos, on July 16, 2013. The inspection and air sampling were performed after the completion of remediation activities by the mold abatement contractor, Restoration Management Company (RMC), who was retained by Orchard Construction. This letter serves as my report of findings.

### Limitations

This report reflects the existing conditions at the time of the inspection and sampling survey. The air sampling findings are limited by the number of air samples collected and by the limitations of the analytical methods used by the laboratory. Nevertheless, the findings are believed to be representative of the conditions sampled and provide an accurate assessment of the conditions evaluated at the time the survey was performed.

Three Waters Park Drive Suite 226 San Mateo California 94403 Tel 650 349.9737 Fax 650 349.3378 www.thecohengroup.com This report has been prepared for the exclusive use of San Mateo County for this particular project. The inspection, sampling survey and report preparation work was performed within the limitations set forth in the Agreement as to the degree of care, amount of time and expense, and any other limitations contained in the Agreement. No other representation, warranty or guarantee, expressed or implied, is included or intended in this report.

### Site Inspections

### Progress Inspection

On July 11, following the start of remediation activities, I conducted a progress inspection of the construction work areas with Blake Takata, Project Manager with RMC. He pointed out several additional locations where visible mold had been identified by the RMC work crew during their initial remediation efforts. I agreed that additional removal of drywall was necessary, which would require an additional containment structure around the alcove in the café where the refrigerated display case had been located (it had been pulled away from the wall to allow access to the drywall behind it). In addition, Blake and his crew foreman pointed out several areas within the original containment, such as in the kitchen office and the waste disposal areas where more drywall than originally anticipated had to be removed (and was removed) when additional visible mold was found and followed by the RMC crew. Finally, a couple of locations were noted where further drywall removal was going to be problematic if removal was warranted by the investigations of the RMC crew, including the wall behind the walk-in freezer (just outside the main containment), the wall next to the end of the serving counter, and the wall at the elevator equipment room. At these locations, it was agreed that the drywall paper backing was to be cleaned as best possible and then "encapsulated" with a mold-inhibiting coating (e.g., Fosters 40-20).

# Final Inspection

I began my post-remediation inspection activities on the afternoon on July 16 at the janitor's room on the 3<sup>rd</sup> floor. RMC was not able to create a closed containment for this room due to the necessity of keeping the water supply (faucet) available to the other contractors working in the building. A small amount of drywall was removed along the bottom two feet of the two walls at the corner where the janitor's drain basin is located. Drywall in the exposed wall cavities behind the basin were observed to be wet from the splashing of water into the basin from the wall-mounted faucet directly above.

I next inspected the janitor's room on the first floor, directly below the janitor's room on the third floor. The zippered door to the containment structure constructed around the corridor entry door and portion of corridor wall outside the room was not secured at the time of inspection and the zipper appeared to be broken. The entire length of the zipper was slightly open since it was secured in only one location near its center by a small piece of tape. The HEPA air cleaning device inside the room was not in operation and its electrical cord had been disconnected from the extension cord used to provide power to air handler. The bottom two feet of drywall had been removed on both walls forming the corner where the drain is located. Additional drywall was removed from the corridor wall and within the "dead space" located directly behind the janitor's room and adjacent to the elevator bank.

I next inspected the main containment for the kitchen area and the secondary containment constructed for the display case alcove ("display nook"). In preparation for the collection of "clearance" air samples, I turned off the air filtration device operating (in recirculation mode) inside each containment and visually inspected the interior surfaces to ensure that the containment perimeters were sealed, all areas of visible mold had been removed, and no significant visible debris remained. The ceiling, floor and wall cavity areas where drywall had been removed inside the display case containment area were covered with plastic (polyethylene) sheeting secured by tape along the edges. Drywall had been removed in multiple locations within the kitchen area containment, including the north wall in the food waste disposal room where the containment had been extended beyond the north wall to accommodate the drywall removal (and at the corner of the elevator equipment room).

### Air Sampling Clearance Survey

### Methodology

Air samples for mold particulates (spores) and other biological/non-biological particles were collected using a Zefon Bio-Pump and Air-O-Cell cassettes (also known as "spore traps"). The Zefon sampler is a battery-operated sampling device specifically designed for use with the Air-O-Cell cassette and is calibrated to a flow rate of approximately 15 liters per minute. At each sampling location, the Zefon sampler was mounted on a tripod, with the Air-O-Cell inlet situated approximately 5 feet above floor level. Each sample was collected at a flow rate of 15 liters per minute for 5 minutes, resulting in a sample volume of approximately 75 liters.

In this manner, one sample was collected within the containment for the first floor janitor's room, two samples within the containment for the display case alcove in the café serving area, and four samples within the containment for the kitchen area. The air samples inside each containment were collected approximately 10 to 30 minutes after the air cleaning devices had been turned off. After the indoor sampling was completed, two outdoor samples were collected for comparison purposes at a location on the walkway at the entrance to the patio situated between the two buildings at Circle Star Way. Sampling was performed between approximately 2:20 pm and 3:45 pm.

After each sample was collected, the cassette was sealed, labeled with an identification number, and subsequently submitted to an independent analytical laboratory that is accredited by the American Industrial Hygiene Association (AIHA) under the Environmental Microbiology Laboratory Accreditation Program (EMLAP). The samples were examined under a microscope in the laboratory to identify the types and amounts of mold spores present in the samples (reported as spores per cubic meter of air sampled).

#### Results

Results of the air sampling survey are shown in Table 1.

In general, the levels of total mold spores measured indoors were lower that the average total spore concentration measured outdoors. Indoor levels ranged from 320 to 2,900 spores/m<sup>3</sup>, compared with the two outdoor air samples, which contained total spore concentrations of 3,100

and 870 spores/m³, respectively. The highest total spore concentration was measured in the 1<sup>st</sup> floor janitor's room where the air cleaning device had not been operating prior to sampling and zippered door to the corridor was not fully closed. The Penicillium/Aspergillus types of spores that predominated in the sample are indicative of prior mold growth within the space, but may also be influenced by spores present in the construction areas outside the containment that entered through the zippered door opening (and via prior unauthorized foot traffic) after cleaning by RMC. It should be noted that the entire building is still an active construction zone, with a good deal of foot traffic and construction-related dust on the floors and other surfaces.

The low indoor concentrations measured in the main kitchen and display case containments are indicative of the level of cleanliness achieved inside those two remediation containment work areas after removal and final cleaning by the RMC crew. One sample contained a slightly elevated level of Penicillium/Aspergillus types of spores, but the other three samples collected within the same containment contained relatively low levels of those same spore types.

### Conclusions

Based on my observations during the site inspection on July 16 and results of the air samples collected, I conclude the following:

- Airborne fungal spore levels measured inside the containment areas after completion of the remediation tasks by Restoration Management Company personnel were generally low relative to outdoor spore levels, indicating successful completion of their drywall removal, surface cleaning and final cleaning tasks.
- Orchard Construction took appropriate action after discovery of the water- and moldimpacted wall areas by initially segregating the affected areas where visible mold was first observed (kitchen and 1<sup>st</sup> floor janitor's room) and promptly retaining the services of a qualified and competent restoration contractor, such as Restoration Management Company.
- The Cohen Group provided verbal notification to Orchard Construction after receiving the laboratory analysis results on July 17 that the remediation had been successfully completed and that rebuilding of the affected wall areas could commence.

Please contact me if you have any questions.

Mark a. Golembienh

Sincerely,

Mark A. Golembiewski, CIH

The Cohen Group

# Mold Remediation Procedures 1 Circle Star Way - Café Area San Mateo County June 20, 2013

#### BACKGROUND

Visible mold was recently identified by Novo Construction personnel in the Café area and the nearby janitor's closet on the north side of the ground floor of the building located at 1 Circle Star Way in San Carlos during tenant improvement work currently in progress that is encompassing the entire, unoccupied building (Note: The building faces southwest, but for purposes of this document and the directional identifications noted herein, will be considered to face west. The main entry lobby and associated center corridor and elevator lobby bisect the building into north and south halves).

A remediation contractor (Restoration Management Co., RMC) was recently retained by Novo Construction (the general contractor at the site) to provide restoration services after a construction-related water leak occurred in the south part of the building and damaged drywall on three floors in primarily the southern half of the building. RMC removed water and water-impacted drywall near the floor level in the affected areas on the ground floor and performed drying of remaining surfaces.

When an initial inspection of the café area was performed by The Cohen Group on Friday, June 14, containment (i.e., floor-to-ceiling plastic sheeting sealed with tape at top and bottom) had been set up by RMC to segregate the rear kitchen area from the serving areas of the café. Similar floor-to-ceiling plastic sheeting had been erected outside the entry door to the nearby janitor/utility room to restrict access to that area as well. A HEPA-filtered air handling unit (AHU) was present inside the kitchen containment and was running in recirculation mode (i.e., no flexible duct was connected to the air exhaust port on the AHU). Portions of drywall in the kitchen and adjacent corridors, have already been removed from several lower wall areas (from the floor to a height of about 4 feet at some locations), as shown in Figure 1, to investigate potentially mold-impacted areas within the wall cavities. The areas of drywall where visible mold was observed by The Cohen Group appeared to be primarily locations where kitchen equipment/appliances had been previously attached to or situated against the walls.

The bottom four inches of the walls in the kitchen area is covered by a ceramic tile base molding (the flooring is also ceramic tile). The suspended ceiling is comprised of 2 ft by 4 ft acoustic tiles in a metal grid, with utilities and equipment located in the space above the ceiling.

#### GENERAL WORK PLAN

Drywall impacted with visible mold will be removed from the lower wall areas (one to three feet from the floor) in the following locations, at a minimum:

- East wall of the kitchen (common with the corridor) between the entry door from the
  corridor and the Dry Storage room (south) and from the entry door north about 25-30 feet
  to the edge of the containment (or further, if needed). This fire-rated wall is constructed
  of two layers of drywall and both layers will need to be investigated for mold.
- West wall of the Dry Storage room both sides of the entry door (short wall to the north and longer wall to the south)
- North wall of the Waste Disposal room (tray/dishes return area outside the Kitchen and Service areas) / South wall of the Kitchen area - length of wall below the tray return 'window' and possibly portions of the walls on either side
- South wall of the Janitor/Utility room at the east end of the elevator bank entire wall (about 6 ft wide) and possibly portions of the walls on either side. The south wall is common with both the elevator lobby and a small dead space ('chase') at the double door entry to the east entrance to the elevator lobby. A section of drywall has already been removed on the corridor side of the 'chase'. The bottom half of the south wall inside the utility room is covered by a fiberglass-reinforced plastic panel. A hot water heater is situated at the southeast corner and a janitor's basin and water faucet are located at the southwest corner.

In addition to the areas listed above where visible mold has been identified, the contractor shall also investigate other suspect locations within the work area that have not already been inspected to ensure that no other areas of suspect mold remain on drywall.

#### **PROCEDURES**

The procedures outlined below are to be followed when disturbing and removing contaminated portions of the walls and cleaning wall cavity surfaces that may be contaminated with fungal growth. The specified approach to remediation contained herein is consistent with "Guidelines on Assessment and Remediation of Fungi in Indoor Environments" (New York City Department of Health, Bureau of Environmental & Occupational Disease Epidemiology, November 2008), guidelines established in *Bioaerosols Assessment and Control* (J. Macher, Editor, ACGIH, 1999) and "Mold Remediation in Schools and Commercial Buildings" (US EPA, March 2001).

### General Requirements for Remediation Personnel

- Remediation personnel will be trained in accordance with the provisions of the Hazard Communication Standard, 8 CCR§5194. Individuals involved in the remediation work and potentially exposed to mold-contaminated materials are to be trained in the health hazards associated with mold exposure and the steps the contractor will take to minimize those hazards.
- Personnel are to be instructed on the procedures described herein, including use of
  personal protective equipment, containment construction, entry and egress procedures,
  hygiene requirements, and waste disposal procedures, appropriate for the level of work to
  be performed (i.e., as described in the pertinent sections below).

- Personnel using respiratory protection will meet all training, fit testing and medical
  evaluation qualifications per 8 CCR §5144. Remediation workers must wear a respirator
  (minimum of P100, half-face air-purifying, or equivalent; disposable protective suit (e.g.,
  Tyvek® coveralls) with head and foot covers; and gloves prior to entering containment.
- All non-remediation (contractor) personnel who enter the contained work area during remediation must wear personal protective equipment consisting of disposable coveralls (e.g., Tyvek®) and respiratory protection (N95 disposable dust masks are appropriate).

### Work Plan for Wall Remediation

- 1. Unauthorized persons are not to be present within the containment when remediation activities begin.
- 2. Ventilation system duct openings/grills (the HVAC system is non-operational) and other penetrations inside the contained area on ceiling, floor and walls must be covered with plastic sheeting that is sealed with duct tape. Ensure that all acoustic ceiling panels are in place and no openings to the space above the suspended ceiling exist.
- 3. Stainless steel Kitchen equipment that has been moved to the middle of the rooms/spaces within the kitchen containment has already been covered with plastic sheeting. Ensure that the bottom edges of the plastic sheeting are secured to the floor (sealed) with tape so that the equipment is completely enclosed.
- 4. Ensure that the existing containments within the café kitchen and outside the janitor's closet are sealed on all sides, top and bottom.
- Additional containment may need to be constructed along the corridor side of the east wall of the kitchen to allow for drywall along the corridor side of the wall to be removed, if needed. Both sides of the kitchen-corridor wall are constructed with two layers of drywall.
- Additional containment may need to be constructed along the north wall of the Waste
  Disposal (tray return) room (other side of the south wall of the tray return window wall in
  the kitchen) to allow for removal of drywall along the base of the Waste Disposal room
  wall.
- Additional containment may need to be constructed along the corridor side of the Janitor/Utility room to allow for access to the 'chase' and/or removal of drywall within that empty space.
- 8. Provide access to each containment with a zippered door. An anteroom may be necessary for removal of materials and PPE by remediation personnel.
- 9. Place a HEPA-filtered air handling unit inside the containment in the kitchen area and operate the unit in negative pressure mode during remediation activities. The unit will be exhausted to the outdoors through a door at the north end of the corridor using a flexible duct (already in place). New primary and secondary filters shall be installed on the HEPA-filtered unit prior to delivery to the site. The HEPA-filtered exhaust unit shall remain in operation until clearance of the work area is completed.

- 10. Attach a small HEPA-filtered air handling unit to the containment constructed for the Janitor/Utility room to place the contained area under a negative pressure during remediation activities. The AHU will be similarly exhausted via the door at the north end of the corridor.
- 11. Carefully cut and remove the visibly affected portions of drywall in the designated locations. Ensure that all drywall containing visible mold is removed by investigating suspect adjoining areas as needed.
- 12. Place removed sections of drywall in plastic disposal bags appropriate for the waste.
- 13. Clean debris from structural members (metal studs and bottom track) as necessary.
- 14. Place used brushes/sponges/rags in waste bags for disposal.
- 15. Once drywall/structural cleanup work is completed, HEPA-vacuum and wet-wipe interiors of all containments (wet wiping as needed) and the exposed wall cavity surfaces.
- 16. Wet-wipe exterior of HEPA vacuum and waste containers prior to removing them from containment. Seal all bags of waste prior to removal from area.
- 17. Workers/visitors exiting containment will remove disposable coverall suit and gloves while inside containment and place them in a waste disposal bag positioned at the entry/egress door.
- 18. Upon completion of remediation activities, the HEPA air handling unit will be placed in recirculation mode until at least one hour prior to the start of clearance air sampling by The Cohen Group.
- 19. The Cohen Group will collect clearance samples inside the contained area approximately 12-24 hours after completion of remediation activities following the sampling procedures delineated below.
- 20. If acceptable results are received (notification given by The Cohen Group), dismantle containment and dispose of plastic sheeting in new disposal container(s). If acceptable results are not received, HEPA-vacuum and wet-wipe interior of containment, exposed wall and wall cavity surface as needed prior to a repetition of air sampling.

# **Clearance Monitoring**

- Remediation of each contained area will be said to be satisfactory when the area passes both visual inspection and clearance air monitoring procedures.
- Contained areas will be inspected by The Cohen Group's Industrial Hygienist and determined to be adequately clean (i.e., areas of visible mold contamination on drywall have been completely removed and all surfaces are free of visible dust and debris).
- 3. Subsequently, the Industrial Hygiene Consultant will perform air monitoring inside and outside of containment. Monitoring for fungal spores will be performed using of Zefon Air-O-Cell cassettes (spore traps). At least two successive air samples will be collected inside each containment area and two successive air samples collected outside the building for comparison.

- 4. The work area will be deemed to have passed clearance monitoring when the findings of samples collected within the work area are similar or less than those obtained from the outdoor sampling; in other words, when 1) the types of fungi present in work area air are approximately the same as those present in adjoining outdoor areas, and 2) the concentrations are equal to or less than those present in adjoining outdoor areas.
- Following remediation and clearance of the contained area by The Cohen Group -- AND NOT BEFORE -- the containment sheeting may be removed and the General Contractor may begin reconstruction activities.

#### **SURROUNDING SITES: SEARCH RESULTS**

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in **bold italics** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

#### STANDARD ENVIRONMENTAL RECORDS

#### Federal CERCLIS NFRAP site List

CERC-NFRAP: Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

A review of the CERC-NFRAP list, as provided by EDR, and dated 10/25/2013 has revealed that there is 1 CERC-NFRAP site within approximately 0.5 miles of the target property.

#### Federal RCRA CORRACTS facilities list

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 09/10/2013 has revealed that there are 3 CORRACTS sites within approximately 1 mile of the target property.

#### Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity

generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 09/10/2013 has revealed that there are 2 RCRA-LQG sites within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 09/10/2013 has revealed that there are 17 RCRA-SQG sites within approximately 0.25 miles of the target property.

#### State- and tribal - equivalent CERCLIS

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk

characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 11/06/2013 has revealed that there are 20 ENVIROSTOR sites within approximately 1 mile of the target property.

### State and tribal leaking storage tank lists

LUST: The Leaking Underground Storage Tank Incident Reports contain an inventory of reported leaking underground storage tank incidents. The data come from the State Water Resources Control Board Leaking Underground Storage Tank Information System.

A review of the LUST list, as provided by EDR, and dated 12/16/2013 has revealed that there are 57 LUST sites within approximately 0.5 miles of the target property.

#### State and tribal registered storage tank lists

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the UST list, as provided by EDR, and dated 12/16/2013 has revealed that there is 1 UST site within approximately 0.25 miles of the target property.

#### Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 09/10/2013 has revealed that there are 3 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

#### **EDR HIGH RISK HISTORICAL RECORDS**

#### **EDR Exclusive Records**

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the EDR MGP list, as provided by EDR, has revealed that there is 1 EDR MGP site within approximately 1 mile of the target property.

PG AND E GAS PLANT REDWOOD CIT	E MARSHALL, WASHINGTON	I, SE 1/2 - 1 (0.937 mi.)	207	436

EDR US Hist Auto Stat: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR US Hist Auto Stat list, as provided by EDR, has revealed that there are 18 EDR US Hist Auto Stat sites within approximately 0.25 miles of the target property.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and

corrective action activities required under RCRA.

Hazardous Waste Summary:

Waste code: D002

Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS

CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE

DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Waste code: D001

Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF

LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT

WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002

Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS

CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D00

Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS

NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE

OF SUCH WASTE WOULD BY WASTE GUNPOWDER.

Environmental Interest/Information System

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal

facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

### HAZARDOUS WASTE BIENNIAL REPORTER

# CRITERIA AND HAZARDOUS AIR POLLUTANT INVENTORY

PCS (Permit Compliance System) is a computerized management information system that contains data on National Pollutant Discharge Elimination System (NPDES) permit holding facilities. PCS tracks the permit, compliance, and enforcement status of NPDES facilities.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

CA WDS:

Facility ID: San Francisco Bay 41I010330

Facility Type: Industrial - Facility that treats and/or disposes of liquid or

semisolid wastes from any servicing, producing, manufacturing or processing operation of whatever nature, including mining, gravel washing, geothermal operations, air conditioning, ship building and repairing, oil production, storage and disposal operations, water

pumping.

Facility Status: Active - Any facility with a continuous or seasonal discharge that is

under Waste Discharge Requirements.

NPDES Number: CAS000001 The 1st 2 characters designate the state. The remaining 7

are assigned by the Regional Board

Reclamation: Not reported POTW: Not reported

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order

should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to

represent no threat to water quality.

Complexity: Category C - Facilities having no waste treatment systems, such as

cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as

dairy waste ponds.

Hazardous Waste Summary:

Waste code: D002

Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS

CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE

DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D007

Waste name: CHROMIUM

Violation Status: No violations found

## Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and

corrective action activities required under RCRA.

Hazardous Waste Summary:

Waste code: D002

Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS

CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D003

Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS

NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE

OF SUCH WASTE WOULD BY WASTE GUNPOWDER.

Waste code: D006

Environmental Interest/Information System

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

#### HAZARDOUS WASTE BIENNIAL REPORTER

### CRITERIA AND HAZARDOUS AIR POLLUTANT INVENTORY

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order

> should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to

represent no threat to water quality.

Category C - Facilities having no waste treatment systems, such as Complexity:

> cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as

dairy waste ponds.

Environmental Interest/Information System

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport. and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Hazardous Waste Summary:

Waste code: D001

Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF

LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT

WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Site History: Extracted from Stantec's July 8, 2009 Additional Site Assessment Report, Site Conceptual Model, and Workplan for Additional

Assessment, San Mateo County does not take responsibility for the accuracy of the statements made or any professional interpretations made in the referenced report. ARCO service station No. 642 is located at 504 Whipple Avenue in Redwood City, California. The site is relatively flat and underwent reconstruction in 2003 as an upgraded retail service station with a new convenience store, six dispenser islands and two 20,000-gallon gasoline underground storage tanks (USTs). The site is bounded to the southeast by Whipple Road, to the northeast by Veterans Boulevard, to the northwest by Carlsen Subaru and to the southwest by a McDonalds restaurant. Currently, the site has six groundwater monitoring wells (MW-1R through MW-6R), which have been monitored and sampled since 2006. Monitoring wells MW-8S and MW-8D were installed during the recently completed scope of

with two other leaking underground storage tank (LUST) sites. These sites are the former Exxon service station located at 503 Whipple Avenue and Olympian/Winston Tires located at 535 Whipple Avenue. The

work. Groundwater monitoring and sampling is currently coordinated

former Exxon service station is currently operated by an independent dealer as a Valero branded service station. A third LUST site is Chevron service station No. 9-4512 located at 585 Whipple Avenue. All three of these LUST sites are located south of the ARCO service station, across Whipple Avenue. In November 1986, five gasoline USTs and one waste oil UST were removed from the site. The contractor who performed the removal activities is unknown. During the tank removal activities, gasoline odor was detected in soil excavated from the former southern gasoline UST pit. Eight soil samples (1 through 8) were collected from the UST excavation sidewalls at approximately 9 feet below ground surface (bgs) and submitted for laboratory analysis. Groundwater was encountered in the gasoline UST excavation at approximately 9 feet bgs and slight hydrocarbon sheen was observed on the groundwater surface. One soil sample (W.O.-1) was collected from beneath the former waste oil UST at a depth of 8.5 feet bgs. Subsequently, approximately 700 cubic yards of petroleumimpacted soil from within the former tank pits was excavated and disposed of at the Mountain View Landfill in Mountain View, California. While excavating a new gasoline UST pit in the northern area of the site, an old abandoned and rusted tank was encountered. After removal of the tank, two soil samples (T-1 and T-2) were collected from approximately 11 feet bgs. Petroleum hydrocarbons were not reported in either of the two samples above laboratory reporting limits. In February 1987, KEI installed groundwater monitoring wells MW-1 through MW-4 at the site. One soil sample was collected from each boring at approximately 4 to 5 feet bgs. Black oily sludge was observed in well MW-1 during a subsequent monitoring and sampling event. In October 1987, MW-1 was destroyed due to the presence of the oily sludge, which precluded sampling. In an effort to remove the black oily material, an area of approximately 6 feet by 12 feet was excavated to a depth of approximately 20 feet bgs. The oily material was reportedly encountered at approximately 8.5 feet bgs. The excavation was backfilled with pea gravel and approximately 30 cubic yards of soil was transported offsite for disposal at a Class I facility. In May 1990, Converse Environmental West (CEW) installed monitoring wells MW-1A and MW-5 and advanced one soil boring (SB-1) to a depth of 15 feet bgs. Well MW-1A was installed as a replacement for well MW-1 which was previously destroyed. Soil boring SB-1 was advanced in order to qualitatively assess the nature of the fill placed in the former UST cavity. During the drilling of SB-1, two distinct types of fill were observed in the

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

#### HAZARDOUS WASTE BIENNIAL REPORTER

PCS (Permit Compliance System) is a computerized management information system that contains data on National Pollutant Discharge Elimination System (NPDES) permit holding facilities. PCS tracks the permit, compliance, and enforcement status of NPDES facilities.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include;

Potential Media Affect: Other Groundwater (uses other than drinking water)

Potential Contaminants of Concern: Gasoline

Site History:

Extracted from CRA's July 24, 2009 Regulatory Response and Soil Vapor Assessment Work Plan, San Mateo County does not take responsibility for the accuracy of the statements made or any professional interpretations made in the referenced report. The site is located on the southeast corner of Whipple Avenue and Winslow Street in a commercial area of Redwood City, California (Figure 1). All underground storage tanks (USTs), dispenser islands, product piping, and former service station facilities were removed in 2005 in preparation for the redevelopment of a new Chevron-branded service station. 1984 Well Installation: In June 1984, Chevron estimated that approximately 1,700 gallons of gasoline had leaked from a product line. Monitoring wells MW-1 through MW-4 were installed onsite to evaluate groundwater conditions. Light non-aqueous phase liquid (LNAPL) was observed in one of the four wells. In August 1984, wells MW-A and MW-B were installed within the former UST cavity and LNAPL was observed in these wells. Chevron estimated approximately 1,188 gallons of LNAPL were recovered between June and August 1984. The original reports that document this work could not be located in Chevrons files. 1988 Soil Vapor Survey: In December 1988, WGR conducted a soil vapor survey at the site. Vapor borings VP-1 through VP-13 were installed to 5 feet below grade (fbg), except for vapor borings VP-6 and VP-9 that were installed to 1 and 3 fbg, respectively. The highest total volatile hydrocarbons (TVH) concentrations were detected in vapor borings VP-3, located near the underground storage tanks (UST), and VP-8, located at the north corner of the site, at 18,000 parts per million (ppm) and 48,400 ppm, respectively. The highest offsite concentration of TVH were detected to the east on an electrical shops property at 1,150 ppm. 1989 Well Installation and Receptor Survey: In January 1989, WGR advanced six soil borings that were completed as groundwater monitoring wells MW-5 through MW-10. The highest detected concentrations of total purgeable petroleum hydrocarbons (TPPH) and benzene in soil were 18,000 milligrams per kilogram (mg/kg) and 10 mg/kg, respectively, in boring MW-9 at 4.5 fbg. A sensitive receptor survey identified only one monitoring well within a \\%-mile radius of the site at the nearby ARCO service station. 1991 Soil Borings and Well Installation: In May 1991, WGR advanced nine soil borings that were completed as groundwater monitoring wells MW-11 through MW-15. The highest detected soil concentrations of total petroleum hydrocarbons as gasoline (TPHg) and benzene were 1,600 mg/kg and 8 mg/kg,

respectively, in boring B-11 at 6.2 fbg. 1996 Well Installation: In

**EDR ID Number** 

January 1996, Gettler-Ryan-Inc. (G-R) installed monitoring well MW-16 to further assess soil and groundwater conditions. No petroleum hydrocarbons were detected in soil samples from boring MW-16. 1996 UST and Product Piping Upgrade: From August through October 1996, Touchstone Developments (Touchstone) removed three 10,000-gallon single-walled fiberglass gasoline USTs, five dispenser islands, and associated product piping. Soil samples TX-1 through TX-8 were collected from the side walls of the UST cavity at 5 fbg, and soil samples P-1 through P-6 were collected from the piping trenches at 3.5 fbg. The highest concentrations of TPHg and benzene in soil were 3,700 mg/kg and 23 mg/kg, respectively, in sample TX-5 at 5 fbg. Approximately 1,200 cubic yards of soil were disposed of at BFIs Ox Mountain facility in Half Moon Bay, California, and Republic Services Vasco Road Landfill in Livermore, California. Approximately 831,900 gallons of carbon-treated water from the UST cavity were discharged to the sanitary sewer from August 1996 through October 1996, under South Bay Sewer Authority permit number SDP-96-21. Touchstone calculated approximately 670 pounds of petroleum hydrocarbons were removed during carbon filtration activities. 2005 Well Destruction: Between Apri

U.S. importer of hazardous waste: No Mixed waste (haz. and radioactive): No Recycler of hazardous waste: No Transporter of hazardous waste: No Treater, storer or disposer of HW: No Underground injection activity: No On-site burner exemption: Nο Furnace exemption: No Used oil fuel burner: No Used oil processor: No User oil refiner: No Used oil fuel marketer to burner: No Used oil Specification marketer: No Used oil transfer facility: No Used oil transporter: No

Hazardous Waste Summary:

Waste code: D001

Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF

LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT

WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D018
Waste name: BENZENE

Violation Status: No violations found

FINDS:

Registry ID: 110014368353

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of

Direction Distance

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA

program staff to track the notification, permit, compliance, and

corrective action activities required under RCRA.

Environmental Interest/Information System

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport,

Potential Media Affect: Other Groundwater (uses other than drinking water)

Potential Contaminants of Concern: Gasoline

Site History:

Extracted from CRA's DECEMBER 15, 2009 SOIL VAPOR SAMPLING REPORT, San Mateo County does not take responsibility for the accuracy of the

statements made or any professional interpretations made in the referenced report. The site is currently a vacant, unpaved lot located at 150 El Camino Real in Redwood City, California. The site was previously occupied by Signal Oil, Mohawk, and Olympian Oil branded service stations. Four underground storage tanks (USTs) and three product dispenser islands were present at the site between 1943 and December 1981; one UST was removed in 1981 and the remaining three were present until 1991. Based on a review of Sanborn Maps (EDR, 2008a) and historical aerial photos (EDR, 2008b), the site existed as a service station between 1943 and 1950. The 1950 Sanborn Map shows a gas and oil structure near the southwest corner of the site and small rectangular structure in the center of the site. The 1962 Sanborn Map shows a building at the northwest corner of the site. Based on Chevrons historical information, in 1977, Mohawk rehabilitated the service station under a lease from Getty Oil. On November 2, 1981, the Fire Department notified Getty Oil that a hydrocarbon odor was entering the house at 20 Avondale Street. The sites USTs were subsequently tested and one of the tanks failed. The UST was removed, leaving three USTs in place. 1981 Preliminary Subsurface Investigation: In December 1981, Kleinfelder Associates installed groundwater monitoring wells 1 through 6 for a preliminary subsurface investigation on behalf of Getty. No soil samples were analyzed from the borings. Light non-aqueous phase liquid (LNAPL) was detected in wells 6 and 7, located downgradient of the USTs. A LNAPL monitoring program was initiated and continued through December 1984. No records of LNAPL thickness or extraction volumes were available. During this same period, hydrocarbon odors were reported in the basement of the house at 20 Avondale Avenue adjacent to the site. Getty installed a continuous electronic monitoring system in the basement of the house. Vapors were detected by the monitoring system in March 1983 and April 1984. 1988 Subsurface Investigation: In March 1988, on the behalf of Texaco, Groundwater Technology, Inc. (GT) advanced eight soil vapor probes, collected soil samples and sampled water from a domestic well on the 20 Avondale Avenue property. Volatile petroleum hydrocarbons were detected in two soil vapor

**EDR ID Number** 

probes approximately 15 feet northwest of the USTs. No benzene, toluene, ethylbenzene, or xylenes (BTEX) were detected in any of the eight soil samples collected. Total petroleum hydrocarbons as gasoline (TPHg) and benzene were detected at 1,200 micrograms per liter (gg/L) and 81 %g/L, respectively, in the groundwater sample from the domestic well located on the 20 Avondale Avenue property. 1989 Domestic Well Destruction: In February 1989, the domestic well located at 20 Avondale Avenue was decommissioned in accordance with San Mateo County Health Department (SMCHD) regulations. 1991 UST Removal: In December 1991, Zaccor removed three USTs for Mr. Mike Bonner, a representative of the 150 El Camino Real property owner. What appeared to be hydrocarbon staining was observed in soil in the UST excavation. All three USTs were reported in good condition with no holes observed. A hydrocarbon sheen was observed on groundwater in the UST excavation at 13 feet below grade (fbg). Five soil samples were collected in native soil at the base of the UST excavation. The highest concentrations detected were 1,926 milligrams per kilogram (mg/kg) total petroleum hydrocarbons as diesel (TPHd), 6,258 mg/kg TPHg, and 0.0276 mg/kg benzene. Approximately 200 cubic yards of hydrocarbon-bearing soil were removed from the site. 1993 Well Destruction, Remedial Excavation, and Subsurface Investigation: In October and November 1993, Converse destroyed monitoring wells 6 through 7, completed another remedial exca

Reclamation: Not reported POTW: Not reported

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order

should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to

represent no threat to water quality.

Complexity: Category C - Facilities having no waste treatment systems, such as

cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as

dairy waste ponds.

Potential Contaminants of Concern: \* Solvents

Site History:

Extracted from Frey's November 5, 2007 Additional Subsurface Investigation and Sensitive Receptor Survey, San Mateo County does not take responsibility for the accuracy of the statements made or any professional interpretations made in the referenced report. The Site is located approximately one mile southeast of downtown San Carlos in a mixed use area occupied by commercial and light industrial businesses and residential properties. The Site is an approximate 2,500 square foot (ft2) lot occupied by an approximate 1,400 ft2 single-st017 structure that currently operates as a restaurant. A dining room occupies the ffont (northeastern) half of the restaurant with a kitchedfoodpreparation area occupying the rear portion of the building. A hallway and bathroom are located on the westerr? portion of the b~!ding. An employee b~tkrocmis located behind the kitchen in the southern comer of the restaurant. The remainder of the Site, behind the restaurant, is covered with asphalt pavement. A portion of the rear of the Site is surrounded by chain-link fencing and is used for equipment storage and additional food preparation. An office building (1776 Laurel Street) is located immediately adjacent to the eastern boundary of the Site and a cosmetic salon (1748 Laurel Street) is located adjacent to the western boundary of the Site. A City-owned service alley borders the southwestern property boundary. Single-family residences occupy the Site vicinity to the south and west of the Site. Commercial and light industrial businesses occupy the majority of properties north and east of the Site. The Cordilleras Creek, a seasonal drainage, is located approximately 300 feet south and east of the Site. The Smith Slough, an extension of the San Francisco Bay is approximately 3,000 feet north of the Site. A review of historical records and a property inspection were conducted for the Site in 1995 by Applied Science and Engineering, Inc. (ASE). Based on information obtained from the City of San Carlos, the Site structure was built in 1948. The histo~yo f Site occupancy and use between 1948 and 1961 is not well documented. Between 1961 and 1991 the building was consisted of two separate businesses under the addresses of 1752 and 1754 Laurel Street. Records indicate that the northwestern half of the structure (1752 Laurel Street) was operated by the property owner as a dry cleaning business from at least 1961 until closure in 1991. Throughout a majority of this time the southeastem half of the building (1754 Laurel Street) was rented out as a catering business. Records maintained by the property/@ cleaning business owner indicate that prior to 1968, the dry cleaning operations were conducted off-Site by other local dry cleaning businesses. In 1968 dry cleaning machinery was purchased by the propertyhusiness owner and dry cleaning activities were conducted on-Site. The use and storage of PCE at the Site was documented during regulatory compliance inspections conducted by the South County Fire Department and the CSMHSA between 1979 and 1991. Subsequent to the closing of the dry cleaning business in 1991, 1752 Laurel Street was used for residential occupancy. In 1995 three hand auger borings were advanced at the Site in order to assess the presence of dry cleaning solvents in soil and groundwater beneath the Site. Soil samples were collected from borings B1 through B3 at the approximate depth of 5-feet below ground surface (bgs). Additionally, one grab sample of groundwater was collected from

**EDR ID Number** 

boring B3, located adjacent to the sewer pipe at the western comer of the building. PCE was detected in each of the soil samples collected from borings B1 throughB3 at concentrations of 130 micrograms per kilogram (mg/kg) to 400 mg/kg. PCE and trichloroethylene (TCE) were detected in the groundwater sample collected from boring B3 at concentrations of 600 micrograms per liter (ug/l) and 15 ug/L, respectively. On December 31, 1998, one soil boring (B4)

Environmental Interest/Information System

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Hazardous Waste Summary:

Waste code: D00

Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF

LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT

WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002

Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS

CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE

Environmental Interest/Information System

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

HAZARDOUS WASTE BIENNIAL REPORTER

CRITERIA AND HAZARDOUS AIR POLLUTANT INVENTORY

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when

Direction
Distance
Elevation

Site Database(s) EPA ID Number

### **BAY AREA CIRCUITS, INC. (Continued)**

1000102309

**EDR ID Number** 

complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Site History: Extracted from Toxichem's June 8, 2007 Sub-Slab Vapor Extraction

> Feasibility Testing Report, San Mateo County does not take responsibility for the accuracy of the statements made or any professional interpretations made in the referenced report. The northern portion of the subject property, with a former address of 895 Brittan Avenue, was occupied by the South County Fire Department

as a fire station from the early 1950's until the mid-1990's. In

March 1993, Applied Science and Engineering (ASE) conducted a soil

S103964371

sampling investigation at the fire station property. The soil investigation was intended to determine the extent of soil impact at the location of a former diesel UST at the fire station that had been excavated in September 1992. Eight soil borings were hand augered to depths of two to seven feet below ground surface (bgs). One soil sample was collected from each boring at a depth of 3.5 to 4 feet bgs, just above the reported depth to groundwater. One boring, identified as B-3, encountered refusal at a depth of approximately two feet bgs. While soil samples were not collected at B-3, strong petroleum odors were noted in the sandy material encountered. The refusal at B-3 was interpreted as possible evidence of an abandoned UST. Laboratory analytical results and field observations indicated the extent of soil contamination appeared to be limited to the area around B-3. The South County Fire Authority contracted to conduct additional excavation. On October 5, 1993, BAI re-excavated a pit where a former unleaded gasoline UST had been located, at the location of B-3. The excavation was extended to remove visibly impacted soil. Laboratory analyses of the soil samples collected from the excavation bottom and side walls, and the excavated soil stock pile indicated that TPHg, TEPHd and BTEX were not detected in any of these soil samples. No groundwater was encountered and the excavation was backfilled with drain rock and aggregate. The SMCoHSA granted closure for the two USTs on April 30, 1996. The southern portion of the subject property was occupied by a fuel service station and tire repair facility from approximately 1970 to 1985, operated by White Front Stores with an address of 1113 Industrial Road, San Carlos. Reportedly, three 10,000-gallon gasoline USTs and fuel dispenser pumps were removed from the subject property in 1985 by Oil Heat Engineering without soil sampling or analyses. HK2/Semco, who removed the tanks and fuel dispensers, verbally reported that the tanks did not appear to have leaked, but that the soil beneath the fuel dispensers may have been impacted by fuel. The excavations were subsequently backfilled with gravel and the surface was repaved. To evaluate the extent of groundwater impact, EMG installed three groundwater monitoring wells (MW-1, MW-2, MW-3) on property adjacent to the subject property in January 1995. MW-1 and MW-2 were drilled to twenty feet bgs and screened from fifteen to twenty feet bgs. MW-3 was drilled to eleven feet bgs and screened from six to eleven feet bgs. Groundwater was encountered at depths of approximately two to five feet bgs. EMG reported free product was not observed in any of the wells, but a strong gasoline odor was noted in MW-3. Soil and groundwater samples were collected from each boring. In February and March 1995, additional investigation activities were conducted. Levine-Fricke measured depths to groundwater in the three subject property groundwater monitoring wells and calculated a groundwater flow and gradient as easterly with a gradient of 0.01 feet per foot. In April 1998, a soil and groundwater investigation was completed on the southern portion of the subject property for The City of San Carlos, the property owner. The soil and groundwater investigation consisted of six borings (B1-B6) from which a total of eleven soil and five groundwater samples were collected. GEI/AES concluded: soil in the southwestern portion of the subject proper

Potential Media Affect: Other Groundwater (uses other than drinking water)

Potential Contaminants of Concern: Gasoline

Site History: Extracted from Green Environment's March 3, 2006 REPORT ON RECEPTOR

SURVEY, CONDUIT STUDY AND ANNUAL GROUNDWATER MONITORING FOR NOVEMBER

2005, San Mateo County does not take responsibility for the accuracy of the statements made or any professional interpretations made in the referenced report. The subject property is located in a mixed commercial, light industrial and residential area. The subject

property is developed with an approximate 14,500 square foot building and asphalt paving. Pacific Gas & Electric Co. owned and occupied the

subject property from the early 1950s through the mid-1970s. According to ERS, PG&E used the subject property as a

maintenance/corporation yard. A-1 Rental Center has occupied the subject property since circa 1980 for the rental and repair of trucks, equipment and tools. In April 1998, Accutite Environmental Engineering of South San Francisco, California (Accutite) oversaw the removal of a total of four (4) underground fuel storage tanks (USTs) from the site. The USTs consisted of two (2) 5,000-gallon gasoline tanks in the eastern portion of the subject property, and one (1) 5,000-gallon gasoline tank and one (1) 5,000-gallon diesel tank in the western portion of the subject property. Accutite collected soil samples from each UST excavation and beneath associated piping, and also collected grab groundwater samples. Groundwater was encountered

at approximately eight (8) feet below groundsurface (bgs) in the excavation pits. Significant concentrations of Total Petroleum

Hydrocarbons as gasoline (TPHg), Benzene, Methyl Tertiary Butyl Ether (MTBE), Tetrachloroethene (PCE), Total Extractable Petroleum

Hydrocarbons (TEPH) and Total Petroleum Hydrocarbons as diesel (TPHd)

were detected in some soil samples. Significant concentrations of

TPHg, Benzene, MTBE and TPHd were also detected in some groundwater samples. Accutite excavated and removed for offsite disposal approximately one hundred forty (140) cubic yards of impacted soil. In May 1999, Applied Remediation Company of San Jose, California

**EDR ID Number** 

(ARC) supervised the excavation of additional soil from the UST pit at the western portion of the subject property and along a trench for UST-associated piping near the UST pit in the eastern portion of the site. Soil samples collected during the excavation activities indicated that significant levels of TPHd, TPHg, MTBE, and Benzene, Toluene, Ethyl Benzene and Xylenes (BTEX) remained in soil. ARC backfilled the excavation areas upon completion of activities with previously excavated soil and with additional clean backfill material from offsite. In August 1999, ARC advanced nine (9) soil borings on the subject property (SB-1 through SB-9). Groundwater was encountered between 8.5 and 10 feet bgs. Soil and groundwater samples were collected from each boring. Significant concentrations of TPHd, TPHg, Ethyl Benzene and Xylenes were detected in soil. Significant concentrations of TPHg, MTBE and BTEX compounds were detected in groundwater. ARC advanced eight (8) additional soil borings in March 2001 (SB-10 through SB-17), collecting soil and groundwater samples. TPHd, TPHg, MTBE and BTEX were detected in both soil and groundwater samples. In April 2002, ARC installed three (3) 2-inch diameter groundwater monitoring wells on the subject property (MW-1, MW-2 and MW-3). The wells were completed to a depth of twenty (20) feet bgs with fifteen (15) feet of well screen. After well development, surveying and gauging, the groundwater flow direction was determined to be to the east-northeast. Groundwater samples were collected from the wells and analyzed for TPHd and TPHg by EPA Method M8015, MTBE and BTEX by EPA Method 8020, and Oil & Grease by EPA Method SM5520C. The only fuel constituent detected above laboratory diction limits was MTBE in Well MW-3, at a concentration of 8.4 micrograms per liter ("g/L). In March 2003, ERS advanced three (3) soil borings (SB-18, SB-19 and SB-20) and installed one

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and

corrective action activities required under RCRA.

Completed Area Name: PROJECT WIDE Completed Sub Area Name: Not reported

Completed Document Type: Removal Action Completion Report

Completed Date: 09/07/1983

Comments: Fifty-five gallon drums and 13 above-ground storage tanks were

decontaminated, inspected, and removed from the facility as part of closure activities. GTE Lenkurt submitted a Closure Report dated

September 7, 1983.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Screening
Completed Date: 11/01/2006

Comments: Site screening found that residual VOCs in groundwater and soil vapor

on western half of property presented acceptable risk from potential groundwater extraction and soil vapor intrusion exposure pathways. No data was available for eastern half of property. Preliminary

Endangerment Assessment recommended for site.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Completed Area Name: PROJECT WIDE Completed Sub Area Name: Not reported

Completed Document Type: Preliminary Assessment Report

Completed Date: 03/31/1991

Comments: Completed PEA. In May 1990, approximately 1500 cubic yards of soil

with lead concentrations of 500 ppm were excavated and removed.

Subsequent investigations revealed "hot spots" with lead

concentrations above 500 ppm.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Screening
Completed Date: 01/16/1990

Comments: Completed Site Screening. Site characterization conducted in 1989

indicated that onsite soils were contaminated with lead at levels greater than 500 mg/kg. A total of 250 individual and composite samples indicated lead concentrations exceeding the STLC & TTLC.

Contamination occupies approximately 6 acres.

**EDR ID Number** 

FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002

Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS

CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D003

Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS

NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE

OF SUCH WASTE WOULD BY WASTE GUNPOWDER.

Waste code: D005 Waste name: BARIUM

Waste code: D006 Waste name: CADMIUM

Waste code: D007

Waste name: CHROMIUM

Waste code: D008 Waste name: LEAD

**EDR ID Number** 

Site History:

Site Location and Description The subject Site is an approximately 12-acre property located at 960 Industrial Road in San Carlos, San Mateo County, California. The Site is bounded by Industrial Road to the northeast, Commercial Street to the northwest, and property occupied by Kelly-Moore to the southwest. Brittan Avenue forms part of the Site's southeastern boundary. Pulgas Creek, a tidally influenced drainage channel, bounds the remainder of the Site's southeastern boundary . The Site is approximately 5 to 10 feet above mean sea level (msl). Located in an area developed primarily for industrial and commercial use, the Site was developed in the 1950s by Litton Electron Devices (Litton). Historical Site operations consist of the design, manufacture, and distribution of microwave components for use in weather radar equipment, medical devices, and communication equipment for military aircraft and ships. Litton operated the Site from 1956 to 2001, when the Site and its operations were purchased by Northrop Grumman. Northrop Grumman sold the facility in 2002 to L3 Communications, which currently operates the Site as L3 Electron Devices. Northrop Grumman has retained the status of 'responsible party' for purposes of environmental monitoring and remediation. No significant changes in Site operations have reportedly occurred during the property transactions. The main building at the Site is a horseshoe-shaped, one- and two-story structure totaling approximately 200,000 square feet. The main building is roughly divided into five sections referred to as Buildings 3A, 3B, 5A, 5B, and 7. The construction of the main building consists of tilt-up concrete walls, concrete floor slabs, and a built-up roofing system. Two smaller structures, a 3,600-square foot chemical storage building and a liquid hydrogen tank pad are located on the northwestern portion of the Site. These structures were constructed in 1983. A small fenced area with a metal roof and concrete slab floor used to store empty drums is located in the southwestern portion of the Site. The remainder of the Site consists of asphalt-paved parking lots with small landscaped areas and vegetation along the banks of Pulgas Creek.

S104494431

closure activities at the Site. In September 2008, ASE advanced nine (9) soil borings in Building 5B by hand auger to depths between 2.0 and 4.5 feet bgs for the collection of soil samples; five (5) of the borings were advanced at the former plating room, and four (4) of the borings were advanced at the former cleaning room. ASE also concrete-cored the bottom of the ENU vault for the collection of one water sample. Soil samples from the former plating room were analyzed for CAM 17 metals and pH, and one sample (from Boring P-4 at the 3.5-foot depth) was also analyzed for cyanide. Soil samples from the cleaning room were analyzed for volatile organic compounds (VOCs) and pH. The water sample was analyzed for pH. No VOCs were detected at concentrations above California Regional Water Quality Control Board (RWQCB) Environmental Screening Levels (ESL) for shallow soil in an industrial/commercial land use setting. Readings for pH were not indicative of hazardous conditions. Soil from the former plating room showed arsenic at concentrations reflective of natural background concentrations. Cyanide was detected at the 3.5-foot depth at a concentration of 10 milligrams per kilogram (mg/kg), which exceeded its RWQCB ESL. In November 2008, upon the request of SMCEH, ASE conducted additional sampling activities around the vicinity of Boring P-4 to determine the extent of cyanide in soil within the former plating room. Four (4) soil borings (P-6 through P-9) were advanced during the investigation. Three (3) of the borings were advanced to the 2.0-foot depth at locations approximately 3 feet away from Boring P-4, and one (1) boring was advanced to the 4.5-foot depth immediately adjacent to Boring P-4. Analytical results showed cyanide in soil at concentrations up to 0.36 mg/kg, with the highest concentration detected at the 4.5-foot depth. Detected concentrations of cyanide were above its RWQCB ESL. Reportedly, it was ASEs opinion that the cyanide was limited in vertical and lateral extent, and that the concentrations were related to naturally-occurring background conditions. On December 3, 2008, ASE submitted a letter to the SMCEH presenting their rationale for the occurrence of cyanide at background concentrations at the Site. ASE concluded that the cyanide concentrations detected in soil were within the range of naturally-occurring background concentrations for cyanide in both San Mateo and Santa Clara counties. In their e-mail correspondence dated December 12, 2008, SMCEH did not concur with ASEs assertion due to the lack of site-specific data to support their understanding of background conditions. SMCEH requested that additional investigation be performed to delineate the extent of cyanide in soil, investigate the potential for cyanide to be present in groundwater, and establish site specific background concentrations for cyanide. On January 23, 2009, L-3 voluntarily entered into a Remedial Action Agreement with SMCEH. The Agreement required that further characterization and potential remedial action, if necessary, be conducted at the Site.

Environmental Interest/Information System

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and

corrective action activities required under RCRA.

Environmental Interest/Information System

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Comments: 2011 Second Semi-Annual Groundwater Monitoring Report

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Monitoring Report
Completed Date: 02/11/2013

Comments: 2012 First Semi-Annual Groundwater Monitoring Report. COCs at the

site are volatile organic compounds (VOCs), which are primarily chlorinated ethenes, 1,4-dioxane, and total petroleum hydrocarbons

(TPH) in the diesel range. The chlorinated ethenes include

tetrachloroethene (PCE), trichloroethene (TCE), dichloroethenes (DCE) and vinyl chloride (VC). The chlorinated ethenes in groundwater occur in two main plumes that merge downgradient. The comingled plumes have traveled approximately 900 hundred feet downgradient in a northeasterly direction. Most wells show a consistent concentration trend (i.e., variable within a range for all sampling results). Some of the wells show either an increasing trend or decreasing trend

chlorinated ethenes.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Monitoring Report
Completed Date: 03/21/2013

Comments: The report includes current and historic groundwater elevation and

analytical test results, groundwater sampling methods, time-series graphs for chemicals of concern (COCs), and concentration maps of selected COCs. COCs at the site are volatile organic compounds (VOCs), which are primarily chlorinated ethenes, 1,4-dioxane, and

total petroleum hydrocarbons (TPH) in the diesel range.

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

**Number of Days to Update:** Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

### STANDARD ENVIRONMENTAL RECORDS

#### Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Number of Days to Update: 78 Next Scheduled EDR Contact: 04/21/2014
Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

#### Federal Delisted NPL site list

**DELISTED NPL: National Priority List Deletions** 

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Last EDR Contact: 01/09/2014

Next Scheduled EDR Contact: 04/21/2014 Data Release Frequency: Quarterly

#### Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

#### Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

### Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 09/10/2013 Date Data Arrived at EDR: 10/02/2013 Date Made Active in Reports: 12/16/2013 Number of Days to Update: 75 Source: Environmental Protection Agency Telephone: (415) 495-8895 Last EDR Contact: 01/02/2014

## Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 09/10/2013 Date Data Arrived at EDR: 10/02/2013 Date Made Active in Reports: 12/16/2013

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 09/10/2013 Date Data Arrived at EDR: 10/02/2013 Date Made Active in Reports: 12/16/2013

Next Scheduled EDR Contact: 04/14/2014 Data Release Frequency: Quarterly

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 09/10/2013 Date Data Arrived at EDR: 10/02/2013 Date Made Active in Reports: 12/16/2013

#### Federal institutional controls / engineering controls registries

US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 12/17/2013 Date Data Arrived at EDR: 01/14/2014 Date Made Active in Reports: 01/28/2014

Number of Days to Update: 14

Source: Environmental Protection Agency

Telephone: 703-603-0695 Last EDR Contact: 12/09/2013

Next Scheduled EDR Contact: 03/24/2014 Data Release Frequency: Varies

US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 12/17/2013 Date Data Arrived at EDR: 01/14/2014 Date Made Active in Reports: 01/28/2014

Next Scheduled EDR Contact: 04/14/2014 Data Release Frequency: Annually

## State- and tribal - equivalent NPL

RESPONSE: State Response Sites

Identifies confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity.

These confirmed release sites are generally high-priority and high potential risk.

Date of Government Version: 11/06/2013 Date Data Arrived at EDR: 11/06/2013 Date Made Active in Reports: 12/03/2013

Number of Days to Update: 27

Source: Department of Toxic Substances Control

Telephone: 916-323-3400 Last EDR Contact: 02/06/2014

Next Scheduled EDR Contact: 05/19/2014
Data Release Frequency: Quarterly

State- and tribal - equivalent CERCLIS

#### ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

Date of Government Version: 11/06/2013 Date Data Arrived at EDR: 11/06/2013 Date Made Active in Reports: 12/03/2013

## ADDITIONAL ENVIRONMENTAL RECORDS

### Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

WMUDS/SWAT: Waste Management Unit Database

Waste Management Unit Database System. WMUDS is used by the State Water Resources Control Board staff and the Regional Water Quality Control Boards for program tracking and inventory of waste management units. WMUDS is composed of the following databases: Facility Information, Scheduled Inspections Information, Waste Management Unit Information, SWAT Program Information, SWAT Report Summary Information, SWAT Report Summary Data, Chapter 15 (formerly Subchapter 15) Information, Chapter 15 Monitoring Parameters, TPCA Program Information, RCRA Program Information, Closure Information, and Interested Parties Information.

#### Local Lists of Hazardous waste / Contaminated Sites

#### US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 12/04/2013 Date Data Arrived at EDR: 12/10/2013 Date Made Active in Reports: 02/13/2014

**DEED: Deed Restriction Listing** 

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

#### Other Ascertainable Records

### RCRA NonGen / NLR: RCRA - Non Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

### HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006

### RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995 Date Data Arrived at EDR: 07/03/1995 Date Made Active in Reports: 08/07/1995

Next Scheduled EDR Contact: 09/01/2008 Data Release Frequency: No Update Planned

### RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

#### HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method.

### EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

#### **EDR HIGH RISK HISTORICAL RECORDS**

#### **EDR Exclusive Records**

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

### EDR US Hist Auto Stat: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

#### OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Electric Power Transmission Line Data Source: Rextag Strategies Corp.

Telephone: (281) 769-2247

U.S. Electric Transmission and Power Plants Systems Digital GIS Data

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

#### AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services,

a federal agency within the U.S. Department of Health and Human Services.

#### **Nursing Homes**

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

#### **Public Schools**

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary

and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

- 1. Groundwater flow direction, and
- 2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

## **GROUNDWATER FLOW DIRECTION INFORMATION**

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

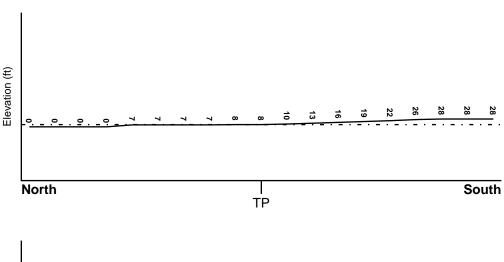

#### **TOPOGRAPHIC INFORMATION**

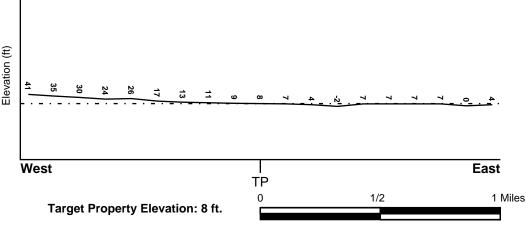

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

#### TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General NE

#### SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

#### HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

NWI Quad at Target Property Data Coverage

PALO ALTO YES - refer to the Overview Map and Detail Map

#### HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

#### Site-Specific Hydrogeological Data\*:

Search Radius: 1.25 miles Status: Not found

#### **AQUIFLOW®**

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

## **GROUNDWATER FLOW VELOCITY INFORMATION**

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

## GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

# DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Urban land

Soil Surface Texture:

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high

water table, or are shallow to an impervious layer.

Soil Drainage Class:

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

	Soil Layer Information							
	Boui	ndary		Classification		Saturated hydraulic

# **LOCAL / REGIONAL WATER AGENCY RECORDS**

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

# PHYSICAL SETTING SOURCE RECORDS SEARCHED

#### **TOPOGRAPHIC INFORMATION**

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

#### HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

#### HYDROGEOLOGIC INFORMATION

AQUIFLOW<sup>R</sup> Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

#### **GEOLOGIC INFORMATION**

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map. USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

#### LOCAL / REGIONAL WATER AGENCY RECORDS

#### FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

#### STATE RECORDS

Water Well Database

Source: Department of Water Resources

Telephone: 916-651-9648

California Drinking Water Quality Database Source: Department of Public Health

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

## OTHER STATE DATABASE INFORMATION

California Oil and Gas Well Locations Source: Department of Conservation

Telephone: 916-323-1779

Oil and Gas well locations in the state.

#### RADON

State Database: CA Radon

Source: Department of Health Services

Telephone: 916-324-2208 Radon Database for California

Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency

(USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

**EPA Radon Zones** 

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor

radon levels.

# Phase I Environmental Site Assessment (ESA) ASTM E 1527-13 User Questionnaire

In order to qualify for one of the *Landowner Liability Protections (LLPs)* offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the "*Brownfields Amendments*"), the *user* must conduct the following inquiries required by 40 CFR 312.25, 312.28, 312.29, 312.30, and 312.31. The *user* should provide the following information (if available) to the *environmental professional*. Failure to conduct these inquiries could result in a determination that "all appropriate inquiries" (AAI) is not complete.

Environmental liens that are filed or recorded against the site (40 CFR 312.25). Did a search of recorded land title records (or judicial records where appropriate) identify any environmental liens filed or recorded against the <i>property</i> under federal, tribal, state or local law?	□yes Xno	□UNK
Activity and land use limitations (AULs) that are in place on the site or that have been filed or recorded in a registry (40 CFR 312.26(a)(1)(v) and (vi)). Did a search of recorded land title records (or judicial records where appropriate) identify any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the property and/or have been filed or recorded against the property under federal, tribal, state or local law?	□yes ⊠no	□unk
Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28). As the <i>user</i> , do you have any specialized knowledge or experience related to the <i>property</i> or nearby properties? For example, are you involved in the same line of business as the current or former <i>occupants</i> of the <i>property</i> or an <i>adjoining property</i> so that you would have specialized knowledge of the chemicals and processes used by this type of business? So year the current of the property of the chemicals and processes used by this type of business?	□YES ØNO	□UNK
Relationship of the purchase price to the fair market value of the property if it were not contaminated (40 CFR 312.29). Does the purchase price being paid for this property reasonably reflect the fair market value of the property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property? To we would be the fact was left to the fact was left value?	<b>1</b>	□UNK
Commonly known or reasonably ascertainable information about the property (40 CFR 312.30). Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example, as user,	□yes 💆no	□unk
<ul> <li>(a.) Do you know the past uses of the property?</li> <li>(b.) Do you know of specific chemicals that are present or once were present at the property?</li> <li>(c.) Do you know of spills or other chemical releases that have taken place at the property?</li> <li>(d.) Do you know of any environmental cleanups that have taken place at the property?</li> <li>All subject to account water as a property?</li> <li>Describe (if known):</li> </ul>	□YES NO □YES NO □YES NO □YES NO	□UNK □UNK □UNK □UNK
The degree of obviousness of the presence of likely presence of contamination at the <i>property</i> , and the ability to detect the contamination by appropriate investigation (40 CFR 312.31). As the <i>user</i> , based on your knowledge and experience related to the <i>property</i> are there any <i>obvious</i> indicators that point to the presence or likely presence of releases at the <i>property</i> ?	∐YES ∑NO	□UNK

# DAVID M. ARRITT Senior Project Manager

## PROFESSIONAL SUMMARY:

David Arritt is an Environmental Professional with over seventeen years of experience in the environmental due diligence industry, and is a California Registered Environmental Assessor. Mr. Arritt has proven expertise in all facets of environmental (Phase I and Phase II) and project management. The majority of his work has been in association with owners or lenders to establish liability management practices and effectively address due diligence requirements with property transfer.

# SELECTED PROJECT EXPERIENCE:

- Phase I Environmental Site Assessments throughout the United States providing professional opinions on property specific risk.

# ALLAN S. COFFEE Associate

## PROFESSIONAL SUMMARY:

Mr. Coffee has over 25 years of experience assisting clients in their relationship with the built environment. He has expertise in all aspects of environmental oversight, regulation, and liability associated with property acquisition, management, and disposition. He also specializes in team leadership and oversight of Due Diligence activities, Phase I ESAs, Building Surveys, Subsurface Soil and Groundwater Sampling, Soil and Groundwater Remediation and Monitoring, as well as Regulatory Closure.

# **SELECTED PROJECT EXPERIENCE:**

- Managed and directed technical and financial aspects of all operations in the Western
  United States Division for a national full-service environmental consulting company,
  including environmental services (Phase I ESAs, soil and groundwater, etc.),
  construction services (asbestos, lead, and other regulated building materials), industrial
  hygiene services (occupational monitoring, negative exposure assessments), and indoor
  air quality (moisture, microbial growth).
- Directed all aspects of environmental geology services for an environmental consulting company, including the oversight and management of technical approach, project budgeting and accounting for Due Diligence, Phase I ESAs, and soil and groundwater remediation.
- Performed Phase I ESAs, Soil and Groundwater Assessments, and regulatory communication for a variety of property owners, environmental consulting companies, and government projects.

#### **EDUCATION AND PROFESSIONAL AFFILIATIONS**

University of California at Los Angeles, CA, Bachelor of Science

OSHA 40-Hour HAZWOPER (Hazardous Waste Operator and Emergency Response)

NIOSH 582 Analyst Equivalent Certification

Indoor Air Quality Specialist/Inspector

California Registered Environmental Assessor I (REA I)

## STEPHEN E. MANELIS

Principal and Co-Founder

### PROFESSIONAL SUMMARY:

Mr. Manelis is co-founder of Blackstone and has over 18 years of experience with Environmental Site Assessments (ESAs) and other Due Diligence consulting during Real Estate Transactions and Mergers/Acquisitions. Specific experience includes Phase I and II ESAs, Environmental Compliance/Audit, and Asbestos, Lead-based paint, Radon gas, and Mold/IAQ consulting, and Property Condition Assessments. Additional experience includes soil/groundwater contamination assessments and regulatory agency coordination, remedial-action planning and management, pre-construction soil and groundwater characterization for urban redevelopment site/Brownfields, NPDES permitting and storm water management; wetland delineation and permitting; and threatened and endangered species studies.

In addition to leading Blackstone's Real Estate and Due Diligence business unit, Mr. Manelis is responsible for developing and maintaining Blackstone's national client accounts program.

# **SELECTED PROJECT EXPERIENCE:**

Managed over 3300 Phase I Environmental Site Assessments (ESAs) for corporate real estate departments, real estate investment trusts (REITs), Fannie Mae/Freddie Mac underwriters, large national and regional banks, private/public investment groups and equity sponsors, and industrial/commercial facilities throughout the United States. In addition to site visit experience on numerous types of real estate, experiences include organization of project staff for single projects and/or portfolios, management of field activities and accurate interpretation of data, and final report QA/QC.

Third party review coordinator and project manager during industrial facility mergers/acquisitions throughout the continental U.S. As consultant to equity partners, provided capital expenditure and annual operating budgets associated with environmental compliance, waste management and disposal, and permitting.

Provided technical support and project management for wetland delineation and habitat assessment studies in the Southeast. Work involved reviewed of wetland field survey activities, surveying and map preparation, and the research of Federal and State databases concerning known occurrences of threatened and endangered species followed by field verification.

Program Manager for due diligence team associated industrial park acquisition by a publicly-traded REIT. Environmental issues included past manufacturing operations,

underground storage tanks usage, various hazardous materials storage, and adjoining property with known groundwater contamination migrating onto the site. Past on-site use and contamination triggered New Jersey ISRA reporting and coordination with the NJDEP. Phase I ESA and Phase II subsurface investigation work completed within 21-days and evaluation of risk and potential remediation cost defined. Quick response and resolution allowed transaction to occur and assigned liability to the appropriate parties protecting the buyer.

Program Manager for redevelopment of industrial property formerly consisting of vehicle repair facility, furniture stripper, machine shop, and light manufacturer. Client was publicly-traded REIT and project included mid-rise 200-unit multi-family housing development with subterranean parking. Contamination identified during due diligence required notification to state regulatory agency with potential to stall acquisition and development approvals. Remediation risk and cost defined during due diligence allowing transaction to occur before regulatory closure achieved. Remediation activities of soil and groundwater performed in conjunction with construction providing savings and fast-tracking regulatory closure with state agency. Project was completed and remains in client portfolio.

Program Manager for environmental due diligence and redevelopment consulting services for privately-held nationwide student housing developer. Project included acquisition and redevelopment of a high profile student housing project in Philadelphia, PA. Work included initial environmental due diligence, identification and resolution of asbestos and underground storage tank risk via sampling, and proper permitting prior to demolition of over 200,000 square feet of building space. Project construction proceeded as planned.
